

# SECTION ON ORAL HEALTH

## Helping to Keep Kids' Smiles Healthy

The American Academy of Pediatrics (AAP) Section on Oral Health (SOOH) focuses on interprofessional work between medical and dental professionals. Pediatricians, pediatric dentists, dental hygienists, residents, medical students, and general dentists who treat children can join!

**Join the Section on Oral Health Today at [aap.org/oralhealth](http://aap.org/oralhealth)**

### ➤ **Establishing Networks and Connections**

For just \$60 a year, Pediatric Dental residents, dentists, and dental hygienists can join the SOOH. Pediatricians pay \$20 and pediatric dentists are free to join the Section in addition to national dues. Joining allows you access to pediatricians and oral health advocates across the country. Members use the listserv to share resources, connect with colleagues, and receive the Friday newsblast that highlights grants, webinars, conferences, scholarships, and recent publications. Connect with the [Chapter Oral Health Advocate](#) in your state.

### ➤ **Developing Leaders**

Our leadership is elected by the Section as a whole. The executive committee is comprised of 3 pediatric dentists and 3 pediatricians. And liaisons from the AAP Section on Early Career Pediatricians, Section on Pediatric Trainees, American Dental Association, American Academy of Pediatric Dentistry, and American Dental Hygienists Association.

### ➤ **Pediatrician & Pediatric Dentist Collaborative Resources**

["Brush, Book, Bed"](#) Family Oral Health Nighttime Routine

[Protect Tiny Teeth](#) Toolkit for pregnant women and families with young children
