

# Children and COVID-19: State Data Report

A joint report from the American Academy of Pediatrics and the Children's Hospital Association  
Summary of publicly reported data from 49 states, NYC, DC, PR, and GU

**Version: 2/10/22**

*Note: The numbers in this report represent cumulative counts since states began reporting. The data are based on how public agencies collect, categorize and post information. All data reported by state/local health departments are preliminary and subject to change and reporting may change over time. Notably, in the summer of 2021, some states have revised cases counts previously reported, begun reporting less frequently, or dropped metrics previously reported. For example, due to several changes on their dashboards and the data currently available, AL and TX data in this report are not current (cumulative data through 7/29/21 and 8/26/21 respectively). Readers should consider these factors. States may have additional information on their web sites.*

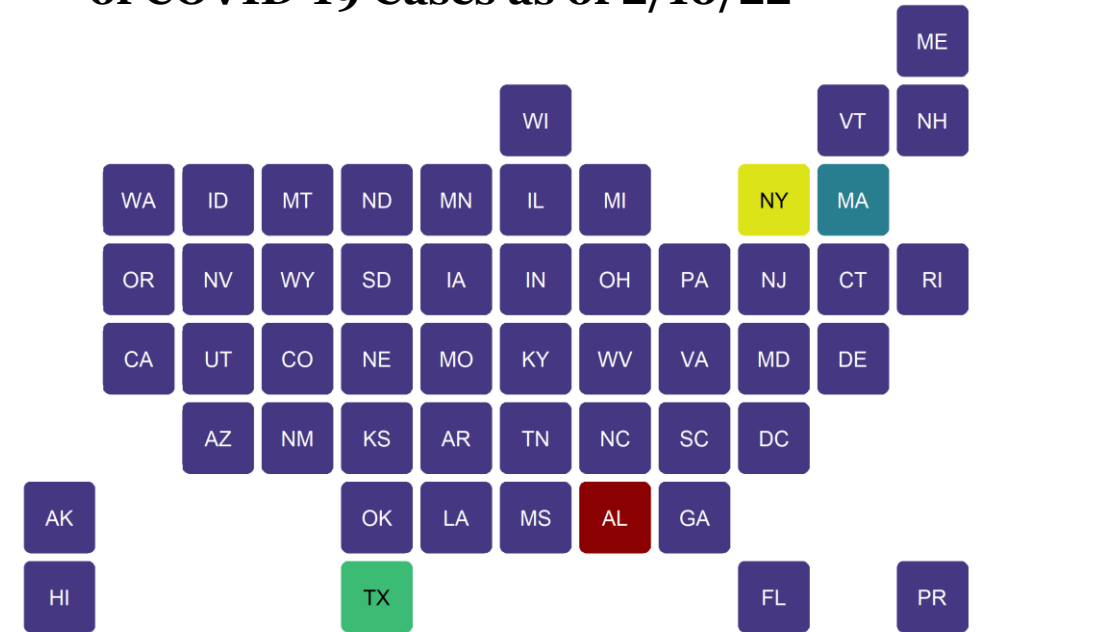

*A number of factors might affect week to week comparisons. During holiday weeks states may change their reporting schedules which may cause irregularities in trends. Shortages of COVID-19 tests during surges and the use of COVID-19 home tests likely affect the undercounting of COVID-19 cases. The extremely high volume of cases during the Omicron surge may have created discontinuities in state reports week to week.*

*On 1/14/22, TX released new data that is NOT included in cumulative case counts or figures but located [here](#) and in Appendix 3B of this report (774,083 cumulative child cases as of 1/20/22). TX previously reported age for only a small proportion of total cases each week (eg, 2-20%); these cumulative cases through 8/26/21 are included (7,754)*

# COVID-19: Available Data for Children

- State-level reports are the best publicly available data on COVID-19 cases in children
- Starting in June 2021, some states reported less frequently and dropped metrics previously reported as overall cases decreased
- This report summarizes what was available on 2/10/22
- **49 states, NYC, DC, Puerto Rico and Guam** provided age distributions of reported COVID-19 cases
  - 25 states and NYC provided age distribution of hospitalizations
  - 46 states, NYC, PR and Guam provided age distribution of deaths

**Fig 1A: States Reporting Age Distribution of COVID-19 Cases as of 2/10/22**

## Reporting age distribution of COVID-19 cases:

- Yes: Reported age distribution of cases
- TX: Reported age distribution for only 2% of cases; Cases through 8/26
- NY: Only NYC reported age distribution of cases
- MA: Only reported age distribution of cases added in past 2 weeks
- AL: Cases through 7/29/21

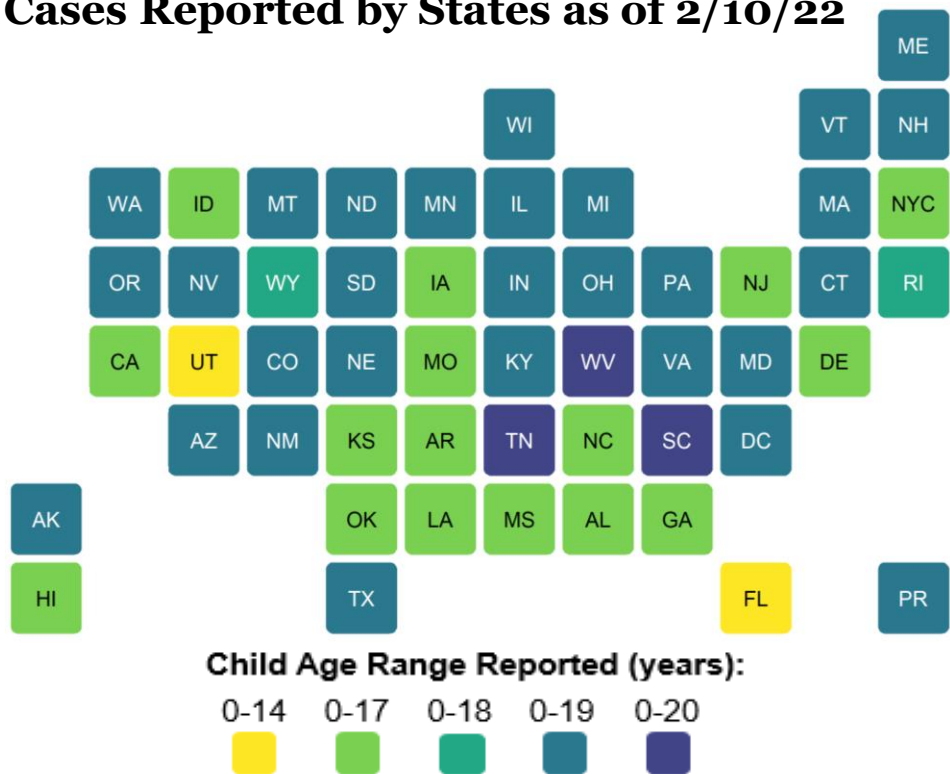

See detail in Appendix: Data from 49 states, NYC, DC, PR, and GU  
Analysis by American Academy of Pediatrics and Children's Hospital Association  
All data reported by state/local health departments are preliminary and subject to change

# Children and COVID-19: Data Limitations

## General Limitations

- Format, content, and metrics of reported COVID-19 data differed substantially by state
- Definition of “child”: Age ranges reported for children varied by state (0-14, 0-17, 0-18, 0-19, and 0-20 years; see Fig 1B)
- Unknown: Number of children infected but not tested and confirmed

**Fig 1B: Child Age Ranges of COVID-19 Cases Reported by States as of 2/10/22**

*See detail in Appendix: Data from 49 states, NYC, DC, PR, and GU; Analysis by American Academy of Pediatrics and Children's Hospital Association; All data reported by state/local health departments are preliminary and subject to change*

## State-Level Changes

- TX: Age distribution reported for only 2% of confirmed cases (99,989/5,328,480) resulting in an undercount of child cases; TX cumulative cases through 8/26/21. As of 1/14/22, TX released new data that is NOT included in cumulative case counts or figures but located [here](#) and in Appendix 3B of this report
- NY: Did not provide age distribution for state-wide cases (NYC only)
- AL: As of 8/13/20, changed definition of child case from 0-24 to 0-17 years; as of 9/17/20, provided age distribution for confirmed cases only; as of 8/5/21, due to change in data available, AL child cases and deaths through 7/29/21
- HI: As of 8/27/20, changed definition of child case from 0-19 to 0-17 years
- MA: As of 9/3/20, revised definition of probable case, leading to a reduction in total case count, and changed reporting from total child cases to cases added in last two weeks
- RI: As of 9/10/20, changed definition of child case from 0-19 to 0-18 years
- MO: As of 10/1/20, changed definition of child cases from 0-19 to 0-17 years
- PR: As of 3/11/21, due to a change in data available, a calculation was required to obtain confirmed and probable child case totals, leading to a reduction in total child case count
- AK: On 6/17/21, did not report child hospitalizations or child deaths
- FL: As of 6/24/21, stopped reporting child hospitalizations; due to change in data available, calculation required to obtain child cases for 0-14 years
- LA: As of 8/5/21, changed reporting total cases and deaths from confirmed to confirmed and probable (combined)
- WV: As of 8/12/21, WV changed definition of child case from 0-19 to 0-20 years
- WA: As of 1/13/22, due to a change in data available, WA cumulative hospitalizations and deaths through 1/6/22
- NE: As of 2/3/22, NE cases and death data are current (including all cases and deaths added since 6/24/21); NE hospitalizations through 6/24/21

# Children and COVID-19: 2/10/22

## Summary of State-Level Data Provided in this Report<sup>^</sup>

Detail and links to state/local data sources provided in Appendix

### Cumulative Number of Child COVID-19 Cases\*

- 12,341,801 total child COVID-19 cases reported, and children represented 18.9% (12,341,801/65,187,326) of all cases
- Overall rate: 16,397 cases per 100,000 children in the population

### Change in Child COVID-19 Cases\*

- 298,931 child COVID-19 cases were reported the past week from 2/3/22-2/10/22 (12,042,870 to 12,341,801) and children represented 21.9% (298,931/1,367,353) of the weekly reported cases
- Over two weeks, 1/27/22-2/10/22, there was an 8.2% increase in the cumulated number of child COVID-19 cases (930,754 cases added (11,411,047 to 12,341,801))

### Cumulative Hospitalizations (25 states and NYC reported)\*

- Among states reporting, children ranged from 1.5%-4.6% of their total cumulated hospitalizations, and 0.1%-1.5% of all their child COVID-19 cases resulted in hospitalization

### Cumulative Mortality (46 states, NYC, PR and GU reported)\*

- Among states reporting, children were 0.00%-0.23% of all COVID-19 deaths, and 3 states reported zero child deaths
- In states reporting, 0.00%-0.01% of all child COVID-19 cases resulted in death

See detail in Appendix: Data from 49 states, NYC, DC, PR, and GU; Analysis by American Academy of Pediatrics and Children's Hospital Association

\* Note: The numbers in this summary represent cumulative counts since states began reporting. In this summary and full report, the data are based on how public agencies collect, categorize and post information. All data reported by state/local health departments are preliminary and subject to change and reporting may change over time. Notably, in the summer of 2021, some states have revised cases counts previously reported, begun reporting less frequently, or dropped metrics previously reported. For example, due to several changes on their dashboards and the data currently available, AL and TX data in this report are not current (cumulative data through 7/29/21 and 8/26/21 respectively). Readers should consider these factors. States may have additional information on their web sites.

A number of factors might affect week to week comparisons. During holiday weeks states may change their reporting schedules which may cause irregularities in trends. Shortages of COVID-19 tests during surges and the use of COVID-19 home tests likely affect the undercounting of COVID-19 cases. The extremely high volume of cases during the Omicron surge may have created discontinuities in state reports week to week.

On 1/14/22, TX released new data that is NOT included in cumulative case counts or figures but located [here](#) and in Appendix 3B of this report (774,083 cumulative child cases as of 1/20/22). TX previously reported age for only a small proportion of total cases each week (eg, 2-20%); these cumulative cases through 8/26/21 are included (7,754)

Fig 2. Cumulative Number of Child COVID-19 Cases: 2/10/22

- 12,341,801 total child COVID-19 cases (cumulative)
- Nine states reported 400,000+ child cases
- Four states reported fewer than 30,000 child cases

See detail in Appendix: Data from 48 states, NYC, DC, PR, and GU (TX excluded from figure)  
All data reported by state/local health departments are preliminary and subject to change  
Analysis by American Academy of Pediatrics and Children's Hospital Association  
Due to available data and changes made to dashboard, AL cumulative cases through 7/29/21

# Fig 3. Percent of Cumulative COVID-19 Cases that were Children: 2/10/22

- Children represented 18.9% (12,341,801/65,187,326) of all available cases
- Fourteen states reported 22% or more of cumulated cases were children

See detail in Appendix: Data from 48 states, NYC, DC, PR, and GU (TX excluded from figure)  
All data reported by state/local health departments are preliminary and subject to change  
Analysis by American Academy of Pediatrics and Children's Hospital Association  
Due to available data and changes made to dashboard, AL cumulative cases through 7/29/21

## Fig 4. Cumulative COVID-19 Cases per 100,000 Children: 2/10/22

- Calculated using state-level population estimates from US Census Bureau (2019)\*
- Overall rate: 16,397 child COVID-19 cases per 100,000 children in the population
- Fourteen states reported more than 22,000 cases per 100,000

See detail in Appendix: Data from 48 states, NYC, DC, PR, and GU (TX excluded from figure)  
 All data reported by state/local health departments are preliminary and subject to change  
 Analysis by American Academy of Pediatrics and Children's Hospital Association  
 Due to available data and changes made to dashboard, AL cumulative cases through 7/29/21

# Fig 5. Cumulative Child COVID-19 Cases and Percent Increase in Child Cases

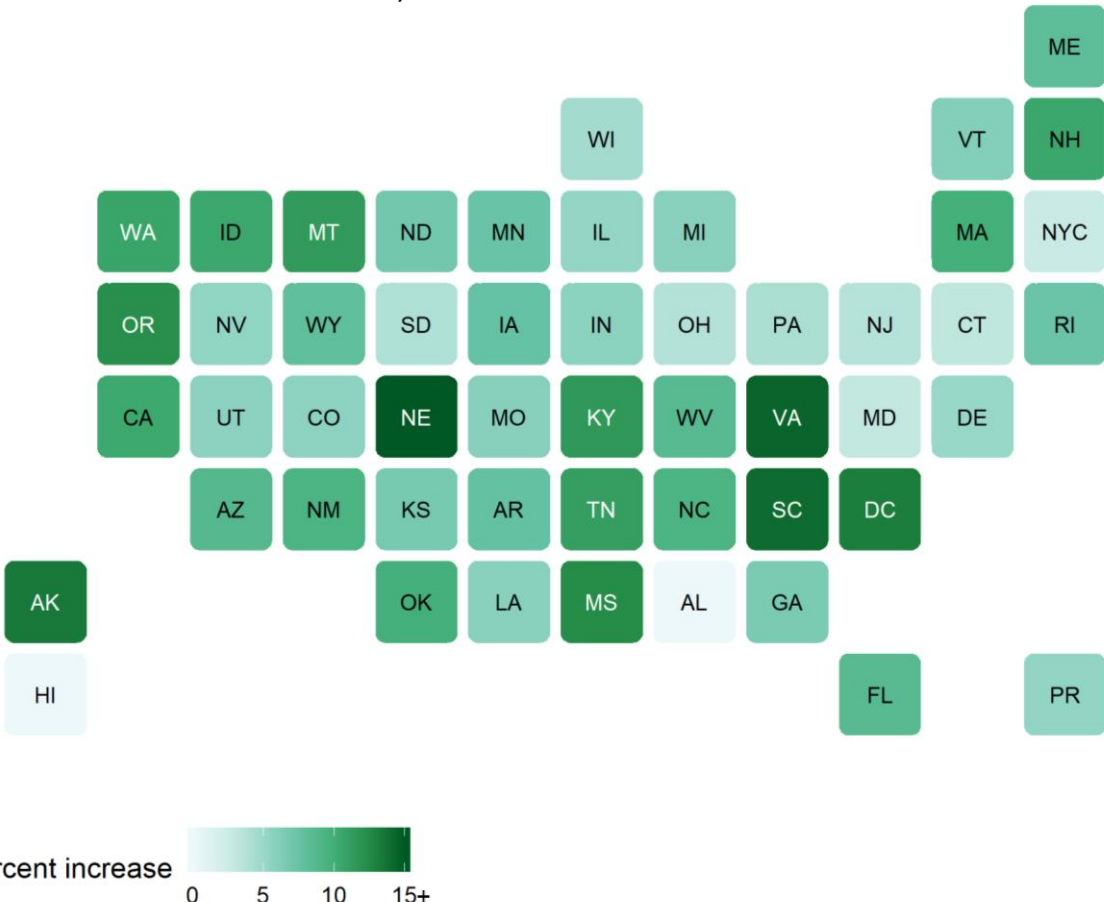

## A. Cumulative Child COVID-19 Cases, 2/10/22

9 states with 400,000+ cumulative child cases

## B. Percent Increase in Child Cases, 1/27/22-2/10/22

From 1/27-2/10, there were 930,754 child cases added (11,411,047 to 12,341,801; 8.2% increase)

See detail in Appendix: Data from 48 states, NYC, DC, and PR (TX excluded from figures)  
All data reported by state/local health departments are preliminary and subject to change; Analysis by American Academy of Pediatrics and Children's Hospital Association  
Due to available data and changes made to dashboard, AL cumulative cases through 7/29/21  
Due to available data and calculations required to obtain MA child cases, weekly estimates fluctuate  
On 2/3/22, HI cumulative child cases and cumulative cases of all ages through 1/13/22  
On 2/10/22 due to available data, DC cumulative child cases through 2/3/22  
As of 2/3/22, NE cases by age are again available and included for 6/24/21 through 2/3/22, resulting in an increase of 53,069 child cases and 220,489 total cases

# Fig 6. United States: Number of Child COVID-19 Cases Added in Past Week\*

\* Note: 5 states changed their definition of child cases: AL as of 8/13/20, HI as of 8/27/20, RI as of 9/10/20, MO as of 10/1/20, WV as of 8/12/21  
 On 1/14/22, TX released new data that is NOT included in cumulative case counts or figures but located [here](#) and in Appendix 3B of this report (774,083 cumulative child cases as of 1/20/22); TX previously reported age for only a small proportion of total cases each week (eg, 2-20%); these cumulative cases through 8/26/21 are included (7,754)  
 Due to available data and changes made to dashboard, AL cumulative cases through 7/29/21  
 Due to available data and calculations required to obtain MA child cases, weekly estimates fluctuate  
 On 2/10/22, HI cumulative child cases and total cases through 1/13/22  
 On 2/10/22 due to available data, DC cumulative child cases through 2/3/22  
 See detail in Appendix: Data from 49 states, NYC, DC, PR and GU  
 All data reported by state/local health departments are preliminary and subject to change; Analysis by American Academy of Pediatrics and Children's Hospital Association

Fig 7. United States: Child COVID-19 Cases Added in Past Week, by Region\*

\* Note: Regions are the US Census Regions  
5 states changed their definition of child cases: AL as of 8/13/20, HI as of 8/27/20, RI as of 9/10/20, MO as of 10/1/20, WV as of 8/12/21  
On 1/14/22, TX released new data that is NOT included in cumulative case counts or figures but located [here](#) and in Appendix 3B of this report (774,083 cumulative child cases as of 1/20/22); TX previously reported age for only a small proportion of total cases each week (eg, 2-20%); these cumulative cases through 8/26/21 are included (7,754)  
Due to available data and changes made to dashboard, AL cumulative cases through 7/29/21  
Due to available data and calculations required to obtain MA child cases, weekly estimates fluctuate  
On 2/10/22, HI cumulative child cases and total cases through 1/13/22  
On 2/10/22 due to available data, DC cumulative child cases through 2/3/22  
See detail in Appendix: Data from 49 states, NYC, DC, PR and GU  
All data reported by state/local health departments are preliminary and subject to change; Analysis by American Academy of Pediatrics and Children's Hospital Association

Fig 8. United States: Number of COVID-19 Cases Added in Past Week for Children and Adults\*

\* Note: 5 states changed their definition of child cases: AL as of 8/13/20, HI as of 8/27/20, RI as of 9/10/20, MO as of 10/1/20, WV as of 8/12/21;  
On 1/14/22, TX released new data that is NOT included in cumulative case counts or figures but located [here](#) and in Appendix 3B of this report (774,083 cumulative child cases as of 1/20/22);  
TX previously reported age for only a small proportion of total cases each week (eg, 2-20%); these cumulative cases through 8/26/21 are included (7,754)  
Due to available data and changes made to dashboard, AL cumulative cases through 7/29/21  
Due to available data and calculations required to obtain MA child cases, weekly estimates fluctuate  
On 2/10/22, HI cumulative child cases and total cases through 1/13/22  
On 2/10/22 due to available data, DC cumulative child cases through 2/3/22  
See detail in Appendix: Data from 49 states, NYC, DC, PR and GU  
All data reported by state/local health departments are preliminary and subject to change; Analysis by American Academy of Pediatrics and Children's Hospital Association

## Appendix Table 1: Case Data Available on 2/10/22

Summary data across the 49 states, NYC, DC, PR, and GU that provided age distribution of reported COVID-19 cases\*

Child population, 2019	Cumulative total cases (all ages)	Cumulative child cases	Cumulative percent children of total cases	Cases per 100,000 children
75,266,842	65,187,326	12,341,801	18.9%	16397.4

\* Note: Data represent cumulative counts since states began reporting; All data reported by state/local health departments are preliminary and subject to change. On 1/14/22, TX released new data that is NOT included in cumulative case counts or figures but located [here](#) and in Appendix 3B of this report (774,083 cumulative child cases as of 1/20/22); TX previously reported age for only a small proportion of total cases each week (eg, 2-20%); these cumulative cases through 8/26/21 are included (7,754). Due to available data and changes made to dashboard, AL cumulative cases through 7/29/21.

## Appendix Table 2A: Summary of Child Case Data from 4/16/20 – 2/10/22\*

Date	Number of locations reporting age	Cumulative total cases (all ages)	Cumulative child cases <sup>^</sup>	Percent children of total cases	Cases per 100,000 children
2/10/22	49 states, NYC, DC, PR and GU <sup>+ ◊</sup>	65,187,326	12,341,801	18.9%	16397.4
2/3/22	49 states, NYC, DC, PR and GU <sup>Δ ◊</sup>	63,819,973	12,042,870	18.9%	16000.2
1/27/22	49 states, NYC, DC, PR and GU <sup>+ ◊ ▲ # &gt;</sup>	61,294,291	11,411,047	18.6%	15160.8
1/20/22	49 states, NYC, DC, PR and GU <sup>+ ◊ •</sup>	57,745,512	10,603,034	18.4%	14087.3
1/13/22	49 states, NYC, DC, PR and GU <sup>≈</sup>	53,230,820	9,452,491	17.8%	12558.6
1/6/22	49 states, NYC, DC, PR and GU <sup>▲ ≈</sup>	48,641,190	8,471,003	17.4%	11254.6
12/30/21	49 states, NYC, DC, PR and GU <sup>-</sup>	45,294,534	7,890,756	17.4%	10483.7
12/23/21	49 states, NYC, DC, PR and GU <sup>-</sup>	43,456,624	7,565,416	17.4%	10051.5
12/16/21	49 states, NYC, DC, PR and GU <sup>○ -</sup>	42,502,606	7,366,865	17.3%	9787.7
12/9/21	49 states, NYC, DC, PR and GU <sup>○</sup>	41,786,102	7,196,901	17.2%	9561.8
12/2/21	49 states, NYC, DC, PR and GU	41,090,717	7,032,612	17.1%	9343.6
11/25/21	49 states, NYC, DC, PR and GU <sup>■ +</sup>	40,497,291	6,899,590	17.0%	9166.8
11/18/21	49 states, NYC, DC, PR and GU	39,961,694	6,767,762	16.9%	8991.7
11/11/21	49 states, NYC, DC, PR and GU <sup>#</sup>	39,397,035	6,625,857	16.8%	8803.2
11/4/21	49 states, NYC, DC, PR and GU	38,944,914	6,503,629	16.7%	8640.8

\* Note: Data represent cumulative counts since states began reporting; All data reported by state/local health departments are preliminary and subject to change

<sup>^</sup> Unknown: number of children infected but not tested and confirmed

+ On 11/25/21, due to available data, DC cumulative child cases through 11/18/21; On 1/20/22 and 1/27/22, due to available data, DC cumulative child cases through 1/13/22; On 2/10/22, due to available data, DC cumulative child cases through 2/3/22

◊ On 1/20/22, 1/27/22, 2/3/22, and 2/10/22 due to data available, HI cumulative child cases and cumulative cases for all ages through 1/13/22

Δ As of 2/3/22, NE cases by age are again available and included for 6/24/21 through 2/3/22, resulting in an increase of 53,069 child cases and 220,489 total cases

▲ On 1/6/22, due to available data, GU cumulative child cases through 12/30/21; On 1/27/22, due to available data, GU cumulative child cases and cumulative cases for all ages through 1/20/22

# On 11/11/21, MA added 5,437 child cases; On 1/27/22, due to available data and calculations required to obtain child cases, there is a downward revision of cumulative child cases for MA (eg, 2,718 fewer cumulative child cases)

> On 1/27/22, due to available data, VA cumulative child cases through 1/20/22

• As of 1/20/22, TX released new data that is NOT included in cumulative case counts or figures but located in Appendix 3B of this report (774,083 cumulative child cases)

≈ On 1/6/22 and 1/13/22, due to available data, OK cumulative child cases through 12/30/21

▲ On 1/6/22, due to available data, GU cumulative child cases through 12/30/21

- On 12/16/21 & 12/23/21, due to available data, MD child cases through 12/9/21; On 12/30/21, due to lag in reporting, MD experienced a very large increase in child cases (eg, 30,764 cases added)

○ On 12/9/21, due to available data, RI cumulative cases through 12/2/21; On 12/16/21, due to lag in reporting, RI experienced a large increase in child cases (eg, 3,285 cases added)

■ Due to the Thanksgiving holiday, most data included for 11/25/21 were posted by States on 11/24/21

## Appendix Table 2A, cont.: Summary of Child Case Data from 4/16/20 – 2/10/22\*

Date	Number of locations reporting age	Cumulative total cases (all ages)	Cumulative child cases^	Percent children of total cases	Cases per 100,000 children
10/28/21	49 states, NYC, DC, PR and GU#	38,496,700	6,396,278	16.6%	8498.1
10/21/21	49 states, NYC, DC, PR and GU	38,080,641	6,295,648	16.5%	8364.4
10/14/21	49 states, NYC, DC, PR and GU	37,611,563	6,177,563	16.4%	8208.1
10/7/21	49 states, NYC, DC, PR and GU#	37,099,164	6,047,371	16.3%	8034.6
9/30/21	49 states, NYC, DC, PR and GU	36,501,460	5,899,148	16.2%	7837.6
9/23/21	49 states, NYC, DC, PR and GU	35,852,579	5,725,680	16.0%	7607.2
9/16/21	49 states, NYC, DC, PR and GU#	35,077,099	5,518,815	15.7%	7332.3
9/9/21	49 states, NYC, DC, PR and GU	34,198,122	5,292,837	15.5%	7032.1
9/2/21	49 states, NYC, DC, PR and GU	33,357,284	5,049,465	15.1%	6708.8
8/26/21	49 states, NYC, DC, PR and GU# •	32,417,814	4,797,683	14.8%	6374.2
8/19/21	49 states, NYC, DC, PR and GU	31,506,988	4,593,721	14.6%	6103.2
8/12/21	49 states, NYC, DC, PR and GU♦	30,700,985	4,413,547	14.4%	5863.9
8/5/21	49 states, NYC, DC, PR and GU# × ≠	30,025,995	4,292,120	14.3%	5702.5

\* Note: Data represent cumulative counts since states began reporting; All data reported by state/local health departments are preliminary and subject to change

^ Unknown: number of children infected but not tested and confirmed

# For several weeks in 2021 (8/5, 8/26, 9/16, 10/7, and 10/28), due to available data and calculations required to obtain child cases, there is a downward revision of cumulative child cases for MA

• As of 7/22/21, TX stopped updating demographic case data; As of 8/26/21, TX started updating demographic case data again and added 2,147 child cases; TX cumulative cases through 8/26/21

♦ As of 8/12/21, WV changed definition of child case from 0-19 to 0-20 years

× As of 8/5/21, due to available data and changes made to dashboard, AL cumulative cases through 7/29/21

≠ On 8/5/21, due to available data and changes made to dashboard, definition of LA total cumulative total cases changed

## Appendix Table 2A, cont.: Summary of Child Case Data from 4/16/20 – 2/10/22\*

Date	Number of locations reporting age	Cumulative total cases (all ages)	Cumulative child cases <sup>^</sup>	Percent children of total cases	Cases per 100,000 children
7/29/21	49 states, NYC, DC, PR and GU	29,402,405	4,198,296	14.3%	5577.9
7/22/21	49 states, NYC, DC, PR and GU <sup>#</sup> •	29,023,908	4,126,570	14.2%	5482.6
7/15/21	49 states, NYC, DC, PR and GU <sup>#</sup> ±	28,793,845	4,087,916	14.2%	5431.2
7/8/21	49 states, NYC, DC, PR and GU	28,645,258	4,064,365	14.2%	5399.9

± As of 8/26/21, NM began reporting mortality data by age; due to only available data, NM is excluded from mortality data percentages

x As of 8/19/21, SC began reporting mortality data by age

# As of 7/30/20, Texas provided age distribution for all COVID-19-associated deaths; Texas reported age for only 2% of total confirmed cases; As of 1/14/21, TX released new data that is only updated monthly- TX cumulative deaths through 2/3/22;

Percent of child cases resulting in death omitted for Texas; Data for Texas in this report is limited to the case count for which age is provided

♦ As of 1/13/22, due to available data and changes made to dashboard, WA cumulative child deaths and cumulative deaths for all ages through 1/6/22

# Frequently Asked Questions

**Q:** *Why are the AAP and CHA collecting this data?*

**A:** Our goal is to provide a weekly snapshot of how COVID-19 is affecting children in the United States. CDC provides a national number of cases by age on its [COVID-19 data tracker](#), but there are no geographic indicators provided and the age data are not released on a regular schedule. Our data collection method allows for tracking the number of child cases weekly, as well as providing publicly reported case numbers for children at the state level.

**Q:** *The age ranges for children in the report are broad – why were these age ranges chosen and are data available for more specific age ranges of children?*

**A:** Each state makes different decisions about how to report the age distribution of COVID-19 cases, and as a result the age range for reported cases varies by state. For the purposes of this report it is not possible to standardize more detailed age ranges for children based on what is publicly available from the states at this time. Please refer to specific state health department websites of interest to see if the state provides more granular detail of cases by age (see report Appendix for links to all state data sources).

**Q:** *What is the definition of a COVID-19 case?*

**A:** COVID-19 cases are defined as persons who have been identified as a confirmed (via a diagnostic molecular test) or probable (via a clinical diagnosis) case. COVID-19 cases are reported by the states, [following reporting standards established by the CDC](#). For more information on the definitions of confirmed and probable cases, see the following resources: [COVID Tracking Project: Definitions](#); [CDC, COVID-19 Data and Surveillance](#).

**Q:** *Why are only a small portion (<5%) of child COVID-19 cases included for Texas?*

**A:** Texas Department of State Health Services reports overall confirmed cases but only a small fraction are included in the age distribution. Other sources for child COVID-19 cases are not included in the report but outline much higher numbers (eg, [Texas Public Schools COVID-19 Data](#)).

**Q:** *Why does the report not provide the percent of child cases that were symptomatic vs. asymptomatic or that had underlying conditions?*

**A:** For the report, we are limited to the data that states are making publicly available. At this time, states are not providing data related to symptoms or underlying conditions and age. CDC provides some information on COVID-19 hospitalizations by age on the [CDC COVID-NET dashboard](#).

**Q:** *For the child population for each state, does that match the listed age range for the state's child COVID-19 data?*

**A:** Yes, the report uses child population numbers that match on directly with the listed age range for children provided by each state. State population numbers were obtained from the [US Census Bureau](#).

**Q:** *The report provides “cumulative totals” for cases, tests, hospitalizations, and deaths for available states. Are those the total numbers since the states began reporting, or since the AAP and CHA started collecting this data?*

**A:** All “cumulative total” data represent cumulative counts since states began reporting COVID-19 data.

**Q:** *How can I learn more about COVID-19 cases in my state?*

**A:** Links to all state data sources are provided in the Appendix.

**Q:** *Are these data final?*

**A:** No. All data reported by state/local health departments included in this report are preliminary and subject to change and revision as health departments gather more information.

**Q:** *Is this the most recent report available? When will a new report be released?*

**A:** The most recent version of the report is available for [download on the AAP website](#). New reports are made available on a weekly basis at [aap.org/CovidStateData](#).

# Additional Resources

- For more information about COVID-19 data in your area, we encourage you to reach out to your state and local health department officials
- Visit the [AAP Critical Updates](#) site for daily updates, resources, and guidance on COVID-19 and pediatrics
- For COVID-19 articles for parents in English and Spanish, visit [HealthyChildren.org](#), the parenting website of the AAP
