Children and COVID-19: State Data Report

A joint report from the American Academy of Pediatrics and the Children's Hospital Association

Summary of publicly reported data from 49 states, NYC, DC, PR, and GU

Version: 8/13/20

CHILDREN'S HOSPITAL ASSOCIATION

American Academy of Pediatrics
DEDICATED TO THE HEALTH OF ALL CHILDREN®

COVID-19: Available Data for Children

- State-level reports are the best publicly available data on COVID-19 cases in children
- This report summarizes what was available on 8/13/20
- **<u>49 states, NYC, DC, Puerto Rico and Guam</u>** provided age distributions of reported COVID-19 cases
  - 9 states provided age distribution of testing
  - 21 states and NYC provided age distribution of hospitalizations
  - 45 states and NYC provided age distribution of deaths

Fig 1A: States Reporting Age Distribution of COVID-19 Cases as of 8/13/20

Reporting age distribution of COVID-19 cases:

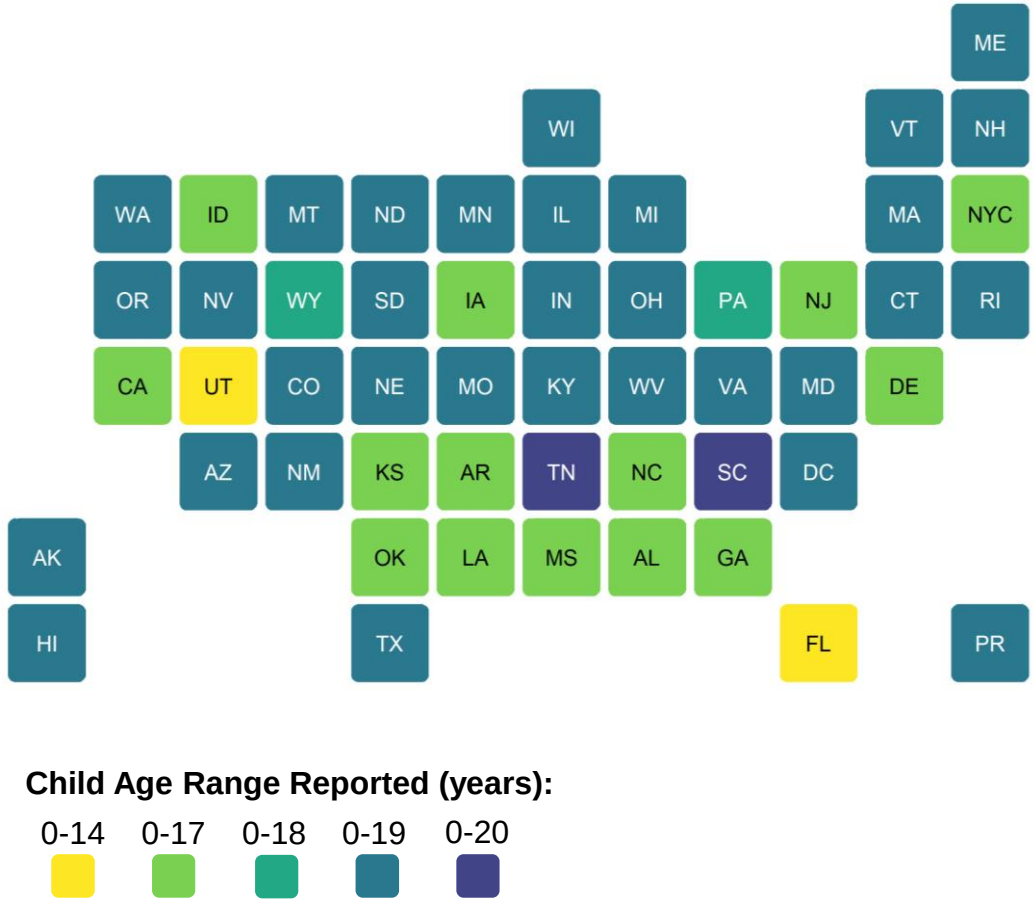
- Yes: Reported age distribution of cases
- Texas: Reported age distribution for only 8% of cases
- New York: Only NYC reported age distribution of cases

See detail in Appendix: Data from 49 states, NYC, DC, PR, and GU
Analysis by American Academy of Pediatrics and Children's Hospital Association
All data reported by state/local health departments are preliminary and subject to change

Children and COVID-19: Data Limitations

- Format, content, and metrics of reported COVID-19 data differed substantially by state
- Definition of "child": Age ranges reported for children varied by state (0-14, 0-17, 0-18, 0-19, 0-20 years; see Fig 1B)
- New York: Did not provide age distribution for state-wide cases (NYC only)
- Texas: Reported age distribution for only 8% of all cases and is excluded from some figures
- Alabama: As of 8/13, changed definition of child cases from 0-24 to 0-17 years; the cumulative results in this 8/13 report represent the 0-17 age category for AL, however AL data excluded from all analysis examining change in cases over time
- Testing: COVID Tracking Project reported that nationwide tests declined 5% in past week (week ending 8/12)
- Unknown: Number of children infected but not tested and confirmed

Fig 1B: Child Age Ranges of COVID-19 Cases Reported by States as of 8/13/20



See detail in Appendix: Data from 49 states, NYC, DC, PR, and GU; Analysis by American Academy of Pediatrics and Children's Hospital Association
All data reported by state/local health departments are preliminary and subject to change

Children and COVID-19: 8/13/20
Summary of State-Level Data Provided in this Report

Detail and links to state/local data sources provided in Appendix

Cumulative Number of Child COVID-19 Cases*

- 406,109 total child COVID-19 cases reported, and children represented 9.1% (406,109/4,486,830) of all cases
- Overall rate: 538 cases per 100,000 children in the population

Change in Child COVID-19 Cases, 7/30/20 – 8/13/20 (Excludes Alabama due to change in definition of child case as of 8/13)^

- 75,755 new child cases reported from 7/30-8/13 (320,954 to 396,709), a 24% increase in child cases over 2 weeks

Testing (9 states reported)*

- Children made up between 3%-12.1% of total state tests, and between 3.6%-18.3% of children tested were tested positive

Hospitalizations (21 states and NYC reported)*

- Children were 0.5%-4.6% of total reported hospitalizations, and between 0.2%-8.8% of all child COVID-19 cases resulted in hospitalization

Mortality (45 states and NYC reported)*

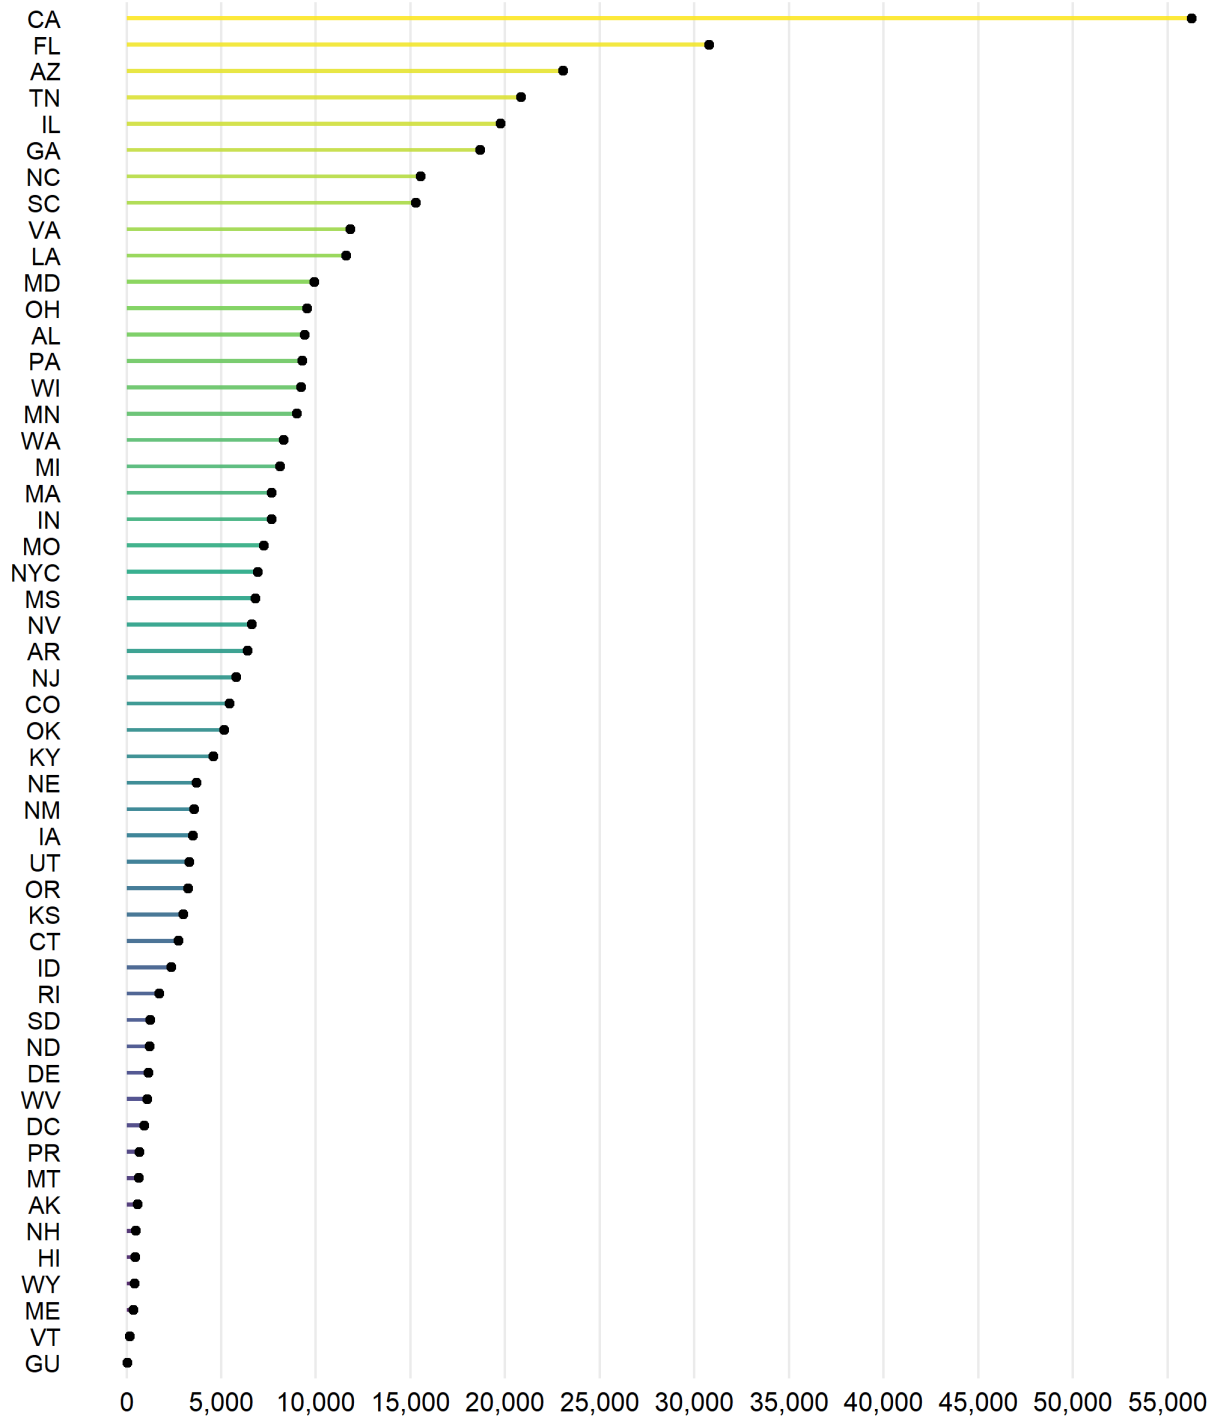
- Children were 0%-0.4% of all COVID-19 deaths, and 20 states reported zero child deaths
- In states reporting, 0%-0.6% all child COVID-19 cases resulted in death

** Note: Data represent cumulative counts since states began reporting; All data reported by state/local health departments are preliminary and subject to change*
See detail in Appendix: Data from 49 states, NYC, DC, PR, and GU; Analysis by American Academy of Pediatrics and Children's Hospital Association

^ Note: As of 8/13, AL changed definition of child case from 0-24 to 0-17 years, resulting in a downward revision of cumulative child cases for AL; AL is excluded from analysis presented in Fig. 5B due to a lack of historical data of AL child cases using the 0-17 years age category

Fig 2. Cumulative Number of Child COVID-19 Cases: 8/13/20

- 406,109 total child COVID-19 cases (cumulative)
- Eight states with 15,000+ cumulative child cases
- Over half of states reported 5,000+ child cases
- Seven states and DC reported fewer than 1,000 child cases



See detail in Appendix: Data from 48 states, NYC, DC, PR, and GU (TX excluded from figure)
All data reported by state/local health departments are preliminary and subject to change
Analysis by American Academy of Pediatrics and Children's Hospital Association

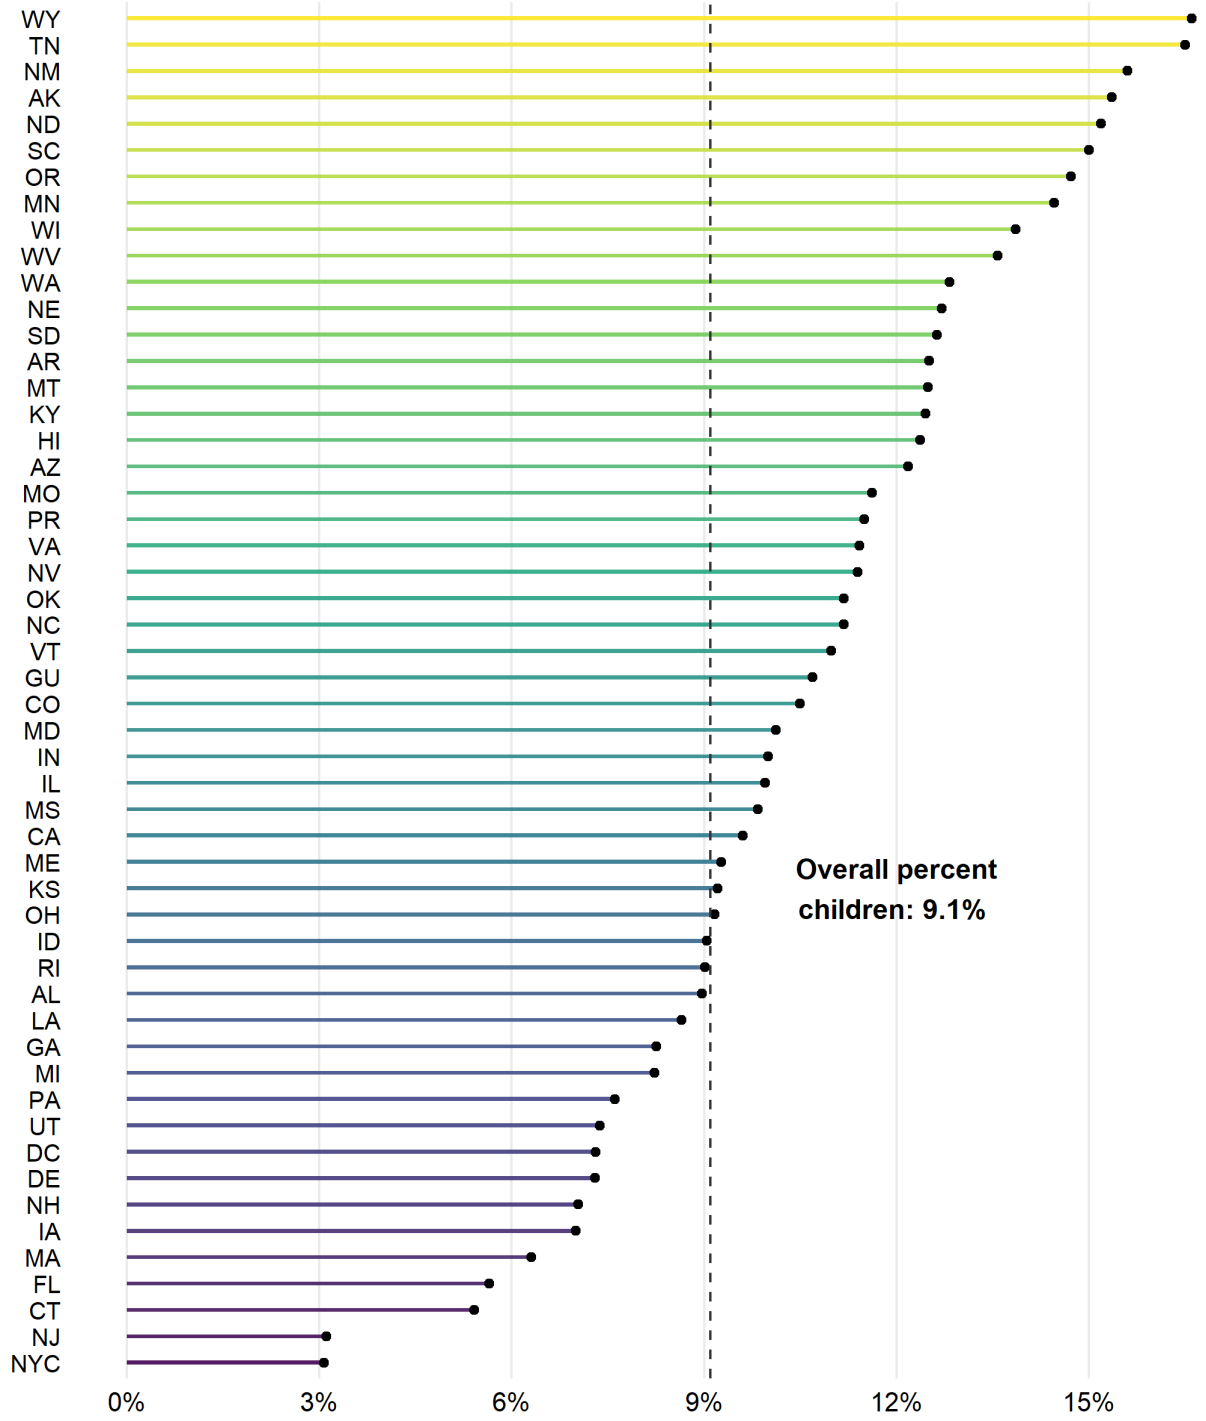
Fig 3. Percent of Cumulative COVID-19 Cases that were Children: 8/13/20

- Children represented 9.1% (406,109/4,486,830) of all available cases
- Twenty-seven states reported 10% or more of cases were children
- NJ and NYC reported that 3.1% or less of cases were children



See detail in Appendix: Data from 48 states, NYC, DC, PR, and GU (TX excluded from figure)
All data reported by state/local health departments are preliminary and subject to change
Analysis by American Academy of Pediatrics and Children's Hospital Association

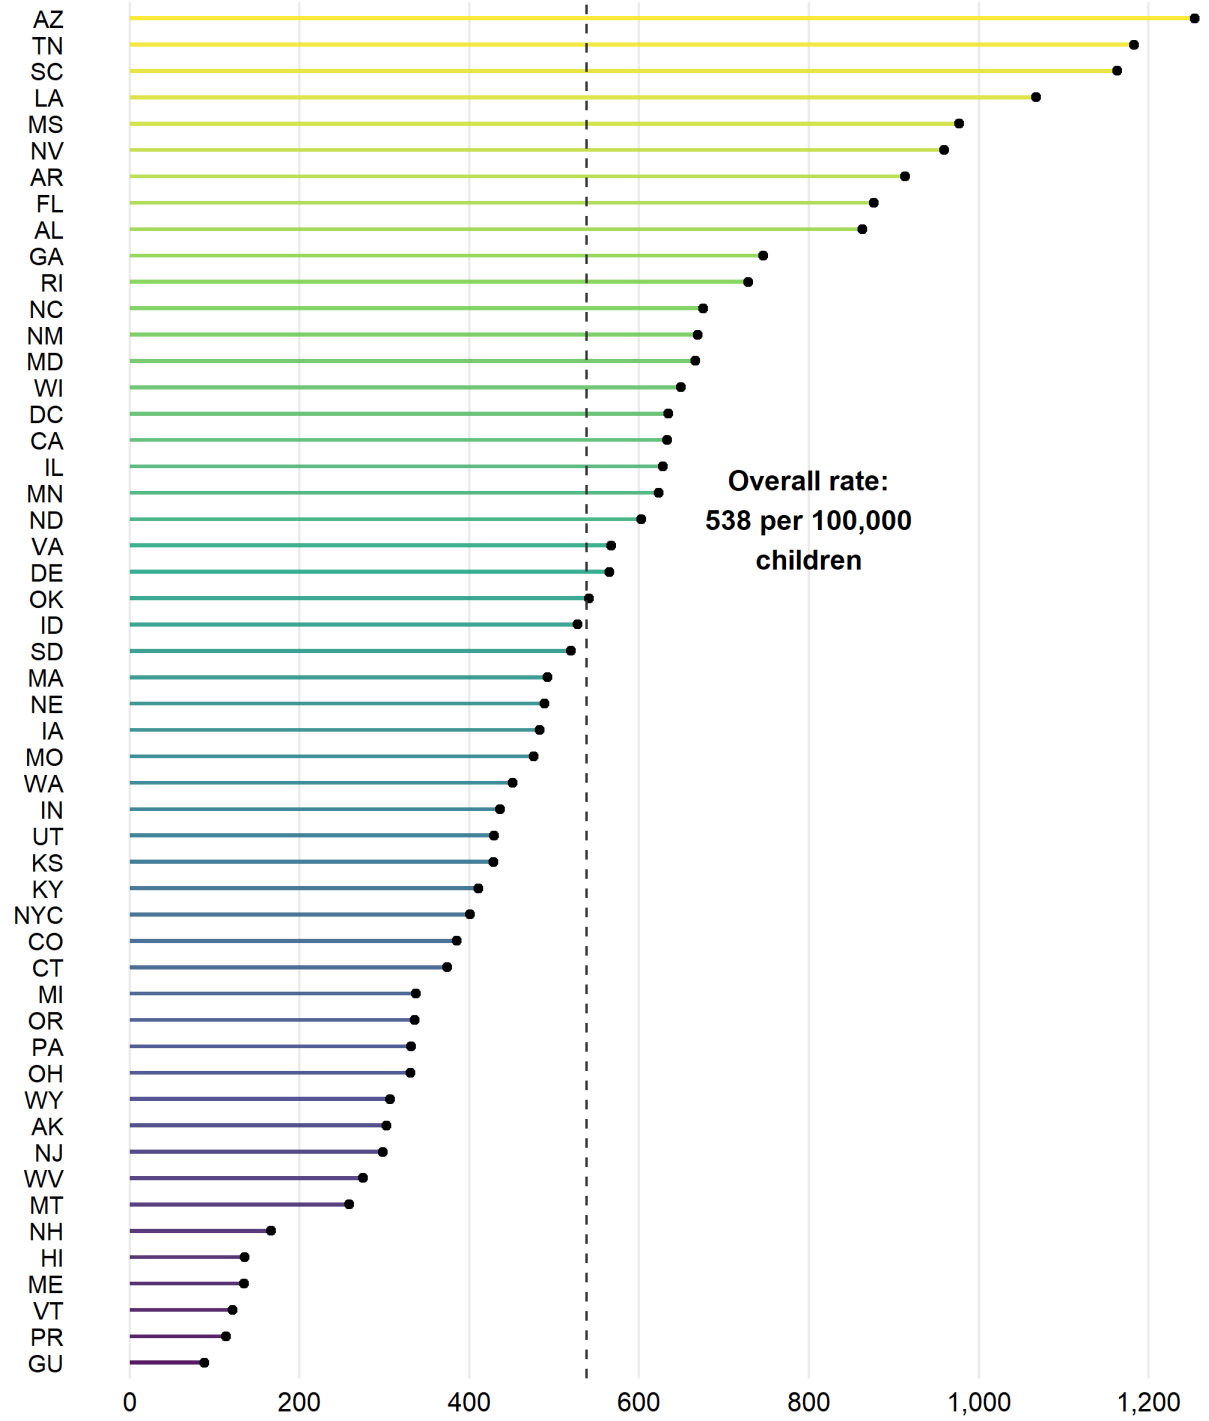
Fig 4. Cumulative COVID-19 Cases per 100,000 Children: 8/13/20

- Calculated using state-level population estimates from US Census Bureau (2019)*
- Overall rate: 538 child COVID-19 cases per 100,000 children in the population
- Twenty-one states and DC reported more than 500 cases per 100,000 children



See detail in Appendix: Data from 48 states, NYC, DC, PR, and GU (TX excluded from figure)
All data reported by state/local health departments are preliminary and subject to change
Analysis by American Academy of Pediatrics and Children's Hospital Association

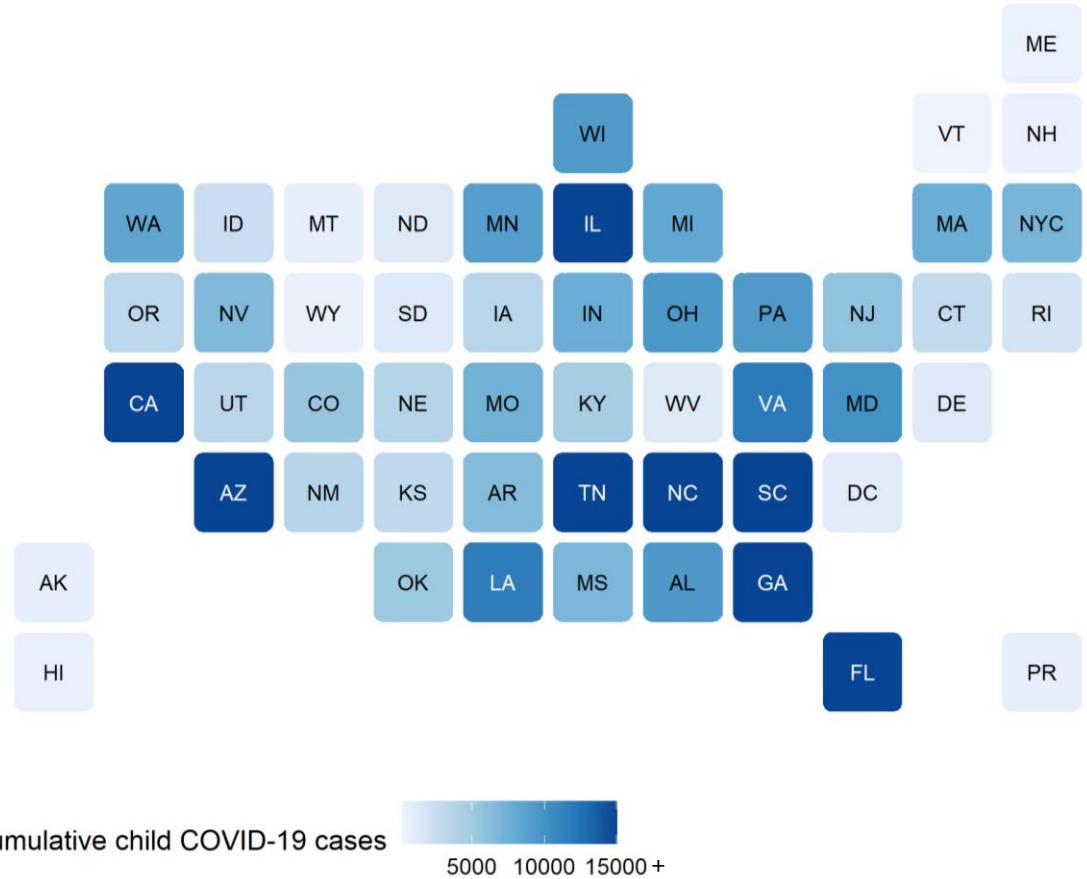
Fig 5. Cumulative Child COVID-19 Cases and Percent Increase in Child Cases

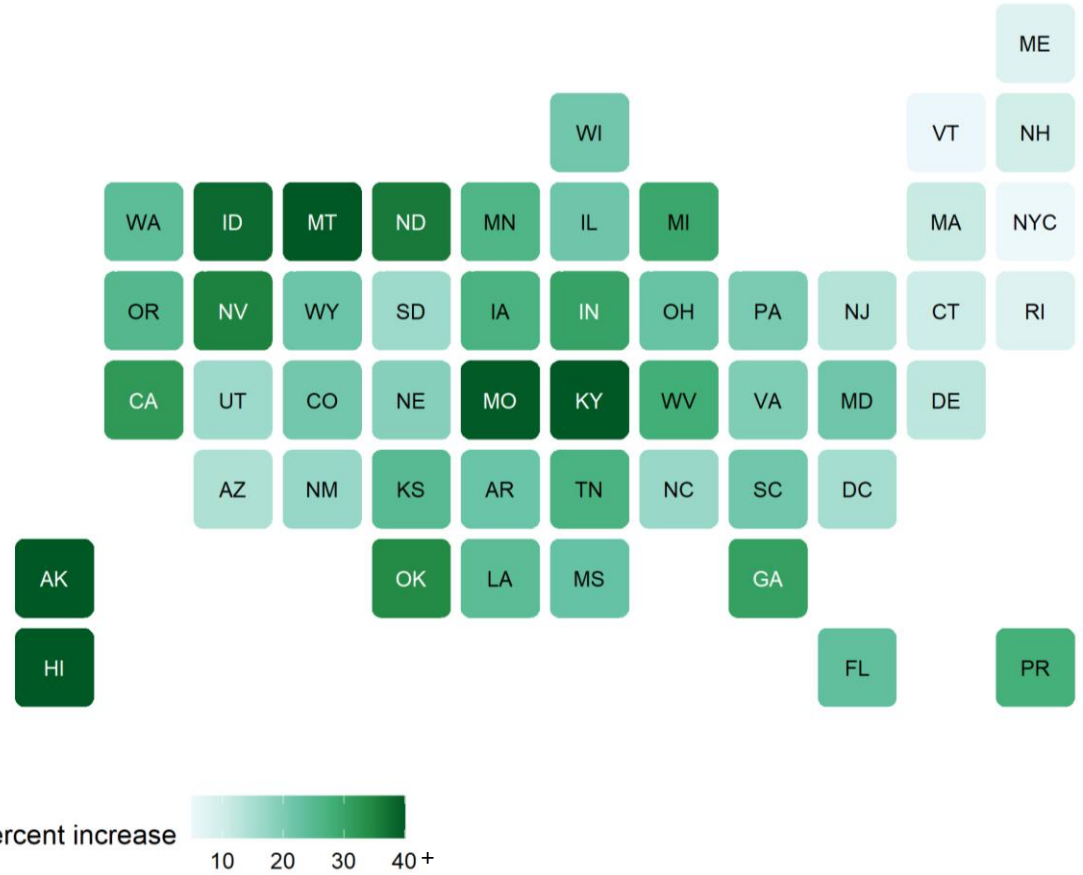
A. Cumulative Child COVID-19 Cases, 8/13/20

Eight states with 15,000+ cumulative child COVID-19 cases



B. Percent Increase in Child Cases, 7/30/20-8/13/20

From 7/30-8/13, there were 75,755 new child cases reported (320,954 to 396,709; 24% increase)*, with over 7 out of 10 new child cases reported from states in the South and West



See detail in Appendix: Data from 48 states, NYC, DC, and PR (TX excluded from figure); All data reported by state/local health departments are preliminary and subject to change
Analysis by American Academy of Pediatrics and Children's Hospital Association

**Note: As of 8/13, AL changed definition of child case from 0-24 to 0-17 years, resulting in a downward revision of cumulative child cases for AL; AL is excluded from analysis presented in Fig. 5B due to a lack of historical data of AL child cases using the 0-17 years age category*

Appendix Table 1: Case Data Available on 8/13/20

Summary data across the 49 states, NYC, DC, PR, and GU that provided age distribution of reported COVID-19 cases*

Child population, 2019	Cumulative total cases (all ages)	Cumulative child cases	Cumulative percent children of total cases	Cases per 100,000 children
75,471,700	4,486,830	406,109	9.1%	538.1

** Note: Data represent cumulative counts since states began reporting; All data reported by state/local health departments are preliminary and subject to change*

Appendix Table 2A: Summary of Child Case Data from 4/16 – 8/13*

Date	Number of locations reporting age	Cumulative total cases (all ages)	Cumulative child cases^	Percent children of total cases	Cases per 100,000 children
8/13/20	49 states, NYC, DC, PR, and GU	4,486,830	406,109	9.1%	538.1
8/6/20	49 states, NYC, DC, PR, and GU	4,159,947	380,174	9.1%	500.7
7/30/20	49 states, NYC, DC, PR, and GU	3,835,573	338,982	8.8%	446.5
7/23/20	49 states, NYC, DC, PR, and GU	3,416,630	288,287	8.4%	379.7
7/16/20	49 states, NYC, DC, PR, and GU	3,042,413	241,904	8.0%	318.6
7/9/20	49 states, NYC, DC, PR, and GU	2,651,066	200,184	7.6%	263.7
7/2/20	49 states, NYC, DC, PR, and GU	2,335,060	165,845	7.1%	218.4
6/25/20	49 states, NYC, DC, PR, and GU	2,073,387	138,213	6.7%	182.0
6/18/20	49 states, NYC, DC, PR, and GU	1,885,905	116,176	6.2%	153.0
6/11/20	49 states, NYC, DC, PR, and GU	1,750,240	98,246	5.6%	129.4
6/4/20	49 states, NYC, DC, PR, and GU	1,623,334	84,016	5.2%	110.7
5/28/20	47 states, NYC, DC, PR, and GU	1,425,154	66,513	4.7%	91.5
5/21/20	47 states, NYC, DC, PR, and GU	1,288,305	54,031	4.2%	74.4
5/14/20	47 states, NYC, DC, PR, and GU	1,159,407	42,370	3.7%	58.3
5/8/130	46 states, NYC, DC, PR, and GU	1,010,112	32,568	3.2%	45.0
4/30/20	47 states, NYC, DC, and PR	849,615	23,096	2.7%	31.8
4/23/20	48 states, NYC, DC, PR, and GU	710,953	15,911	2.2%	21.2
4/16/20	46 states, NYC, and DC	456,923	9,259	2.0%	13.3

** Note: Data represent cumulative counts since states began reporting; All data reported by state/local health departments are preliminary and subject to change*

^ Unknown: number of children infected but not tested and confirmed

Appendix Table 2B: Summary of Child Hospitalization Data from 5/21 – 8/13*

Date	Number of locations reporting age distribution of hospitalizations	Cumulative total hospitalizations (all ages)	Cumulative child hospitalizations	Percent children of total hospitalizations	Hospitalization rate^
8/13/20	21 states and NYC	225,893	3,849	1.7%	1.9%
8/6/20	20 states and NYC	206,189	3,276	1.6%	2.2%
7/30/20	20 states and NYC	195,106	2,669	1.4%	2.0%
7/23/20	20 states and NYC	181,345	2,304	1.3%	2.0%
7/16/20	20 states and NYC	172,787	2,074	1.2%	2.1%
7/9/20	20 states and NYC	164,158	1,948	1.2%	2.4%
7/2/20	20 states and NYC	156,640	1,780	1.1%	2.6%

** Note: Data represent cumulative counts since states began reporting; All data reported by state/local health departments are preliminary and subject to change*

^ Number of child deaths / number of child cases; # As of 7/30, Texas provided age distribution for all COVID-19-associated deaths (previously provided for only a subset)

Frequently Asked Questions

- *Q: Why are the AAP and CHA collecting this data?*
  - A. Our goal is to provide a weekly snapshot of how COVID-19 is affecting children in the United States. CDC provides a national number of cases by age on its COVID-19 data tracker, but there are no geographic indicators provided and the age data is not released on a regular schedule. Our data collection method allows for tracking the number of child cases weekly, as well as providing publicly reported case numbers for children at the state level.
- *Q: The age ranges for children in the report are broad – why were these age ranges chosen and are data available for more specific age ranges of children?*
  - A: Each state makes different decisions about how to report the age distribution of COVID-19 cases, and as a result the age range for reported cases varies by state. For the purposes of this report it is not possible to standardize more detailed age ranges for children based on what is publicly available from the states at this time. Please refer to specific state health department websites of interest to see if the state provides more granular detail of cases by age (see report Appendix for links to all state data sources).
- *Q: What is the definition of a COVID-19 case?*
  - A: COVID-19 cases are defined as persons who have been identified as a confirmed (via a diagnostic molecular test) or probable (via a clinical diagnosis) case. COVID-19 cases are reported by the states, following reporting standards established by the CDC. For more information on the definitions of confirmed and probable cases, see the following resources: Covid Tracking Project: Definitions; CDC, COVID-19 Data and Surveillance
- *Q: Why does the report not provide the percent of child cases that were symptomatic vs. asymptomatic or that had underlying conditions?*
  - A: For the report, we are limited to the data that states are making publicly available. At this time, states are not providing data related to symptoms or underlying conditions and age. CDC provides some information on COVID-19 hospitalizations by age on the CDC COVID-NET dashboard.
- *Q: For the child population for each state, does that match the listed age range for the state's child COVID-19 data?*
  - A: Yes, the report uses child population numbers that match on directly with the listed age range for children provided by each state. State population numbers were obtained from the US Census Bureau.
- *Q: The report provides "cumulative totals" for cases, tests, hospitalizations, and deaths for available states. Are those the total numbers since the states began reporting, or since the AAP and CHA started collecting this data?*
  - A: All "cumulative total" data represent cumulative counts since states began reporting COVID-19 data.
- *Q: How can I learn more COVID-19 cases in my state?*
  - A: Links to all state data sources are provided in the Appendix.
- *Q: Are these data final?*
  - A: No. All data reported by state/local health departments included in this report are preliminary and subject to change and revision as health departments gather more information.
- *Q: Is this the most recent report available? When will a new report be released?*
  - A: The most recent version of the report is available for download on the AAP website. New reports are made available for download on a weekly basis.

Additional Resources

- For more information about COVID-19 data in your area, we encourage you to reach out to your state and local health department officials
- Visit the **AAP Critical Updates** site for daily updates, resources, and guidance on COVID-19 and pediatrics
- For COVID-19 articles for parents in English and Spanish, visit **HealthyChildren.org**, the parenting website of the AAP
