

## American Academy of Pediatrics GLOBAL HEALTH PROGRAMS

The American Academy of Pediatrics (AAP), a professional membership organization of more than 67,000 pediatricians and child health experts, seeks to attain optimal physical, mental, and social health and well-being for **ALL** infants, children, adolescents and young adults. By engaging diverse sets of child health care providers in-country, the AAP supports evidence-based, adaptive population health policies and interventions to the world's most pertinent and emerging concerns for children in all settings.

### SUPPORTING NEWBORN AND CHILD HEALTH

143

Countries where **Neonatal Resuscitation Program (NRP)** courses are taught

Provides **technical assistance** to improve **immunization systems, newborn care best practices, quality improvement, and early childhood development** to professional associations, civil society, and governments

850K+

Providers in 27 languages in 80+ countries **trained in the Helping Babies Survive (HBS)** suite of courses

**Partners** with non-traditional stakeholders to **evaluate life-saving technologies for newborns and children** for implementation and to **improve service delivery**

454

Child health providers, public health professionals, and youth **trained to be the voice for children to impact national and sub-national child health policy** via immunization and non-communicable disease (NCD) advocacy workshops

**Develops clinical tools** for newborn and child health using state-of-the-art evidence to **support health providers to interpret guidelines and clinical recommendations**

### ADVOCATING FOR ADOLESCENTS AND YOUNG ADULTS

Encourages the **US government to support NCD** and adolescent health interventions and policies as well as **advocates directly to the WHO and UN** to prioritize the life-course approach to health

**Trains pediatricians in coordination with national pediatric societies** to mobilize child health providers and implement comprehensive **tobacco control and prevention strategies**

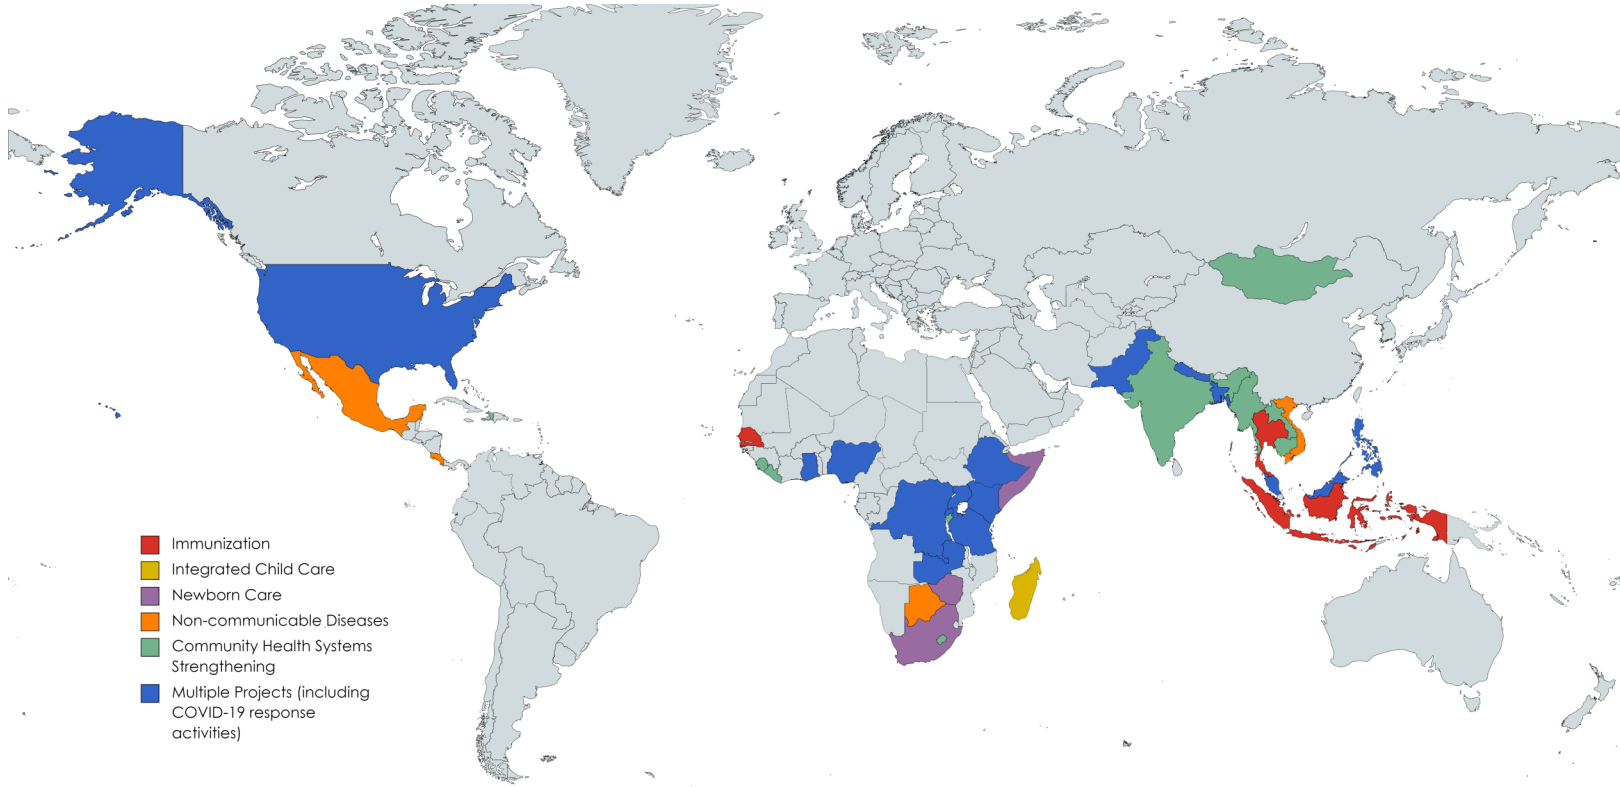

**Validates suicide prevention screening tools** for adolescents in low-resource settings

# CURRENT GLOBAL HEALTH PROGRAMS FOOTPRINT

SUPPORTING NEWBORN AND CHILD HEALTH | ADVOCATING FOR ADOLESCENTS AND YOUNG ADULTS

- Immunization
- Integrated Child Care
- Newborn Care
- Non-communicable Diseases
- Community Health Systems Strengthening
- Multiple Projects (including COVID-19 response activities)

## AAP TRAINING PROGRAMS HAVE A GLOBAL REACH

- **NCD Advocacy workshops** in 6 WHO regions attended by representatives from 65 countries
- **Neonatal Resuscitation Program** implemented in 143 countries
- **Advanced Pediatric Life Support** implemented in 23 countries
