The Importance of **Confidential Preventive Services**

Working Together to Improve Teen Health

The Benefits of Confidential Health Care

- Encourages health care independence
- Prepares youth to discuss their health care needs

Only a portion of youth are getting confidential care during healthcare visits.

Youth Who Have Had Who Have Had **Discussions** About **One-on-One Time** Confidentiality Adolescents 'ouna Adults Adolescents

ages 18-26

Confidential care is good for their health.
