

## Your Donor Impact

Because you give for kids

### **Your AAP donations give life to new projects for kids.**

The Community Access to Child Health (CATCH) program is a flagship initiative of the American Academy of Pediatrics that supports pediatricians and residents to collaborate within their communities to advance the health of all children. Through a competitive process, CATCH awards seed funding for planning and implementation grants to pediatricians.

### **Donations to the Friends of Children Fund provide essential support for the AAP CATCH Program.**

Right now, you can witness exactly how those donations make a major impact through CATCH grants. In the [2021 CATCH Virtual Poster Hall](#), you will see over 20 posters featuring the project activities and results of recent CATCH grant award recipients (*AAP ID and password required to view*).

View a poster with its accompanying audio on projects ranging from addressing obesity among Latinx youth to home visits that promote safe firearm storage. [Take a look](#) and see how your donations are really making a difference. **Thank you for helping make these CATCH grants a reality.**

I look forward to highlighting another meaningful impact that your donation has on children and pediatricians.

With gratitude,

Lee Savio Beers, MD, FAAP  
President
