a. For children who turn 4 to 5 years during their vaccine series, follow dosing recommendations based on age at the time of vaccination.

b. COVID-19 vaccine doses from the same manufacturer should be administered whenever recommended. In the following circumstances, an age-appropriate COVID-19 vaccine from a different manufacturer may be administered: (1) Same vaccine not available at the vaccination site at the time of the clinic visit, (2) Previous dose unknown, (3) Person would otherwise not receive a recommended vaccine dose, (4) Person starts but unable to complete a vaccination series with the same COVID-19 vaccine due to a contraindication. A Vaccine Adverse Event Reporting System (VAERS) report is not indicated in these circumstances.

c. Individuals who are moderately to severely immunocompromised have the option to receive one additional dose of updated mRNA vaccine at least 8 weeks following the last recommended dose. Further additional doses may be administered at ≥8 week intervals, informed by clinical judgement of the healthcare provider and personal preference and circumstances.

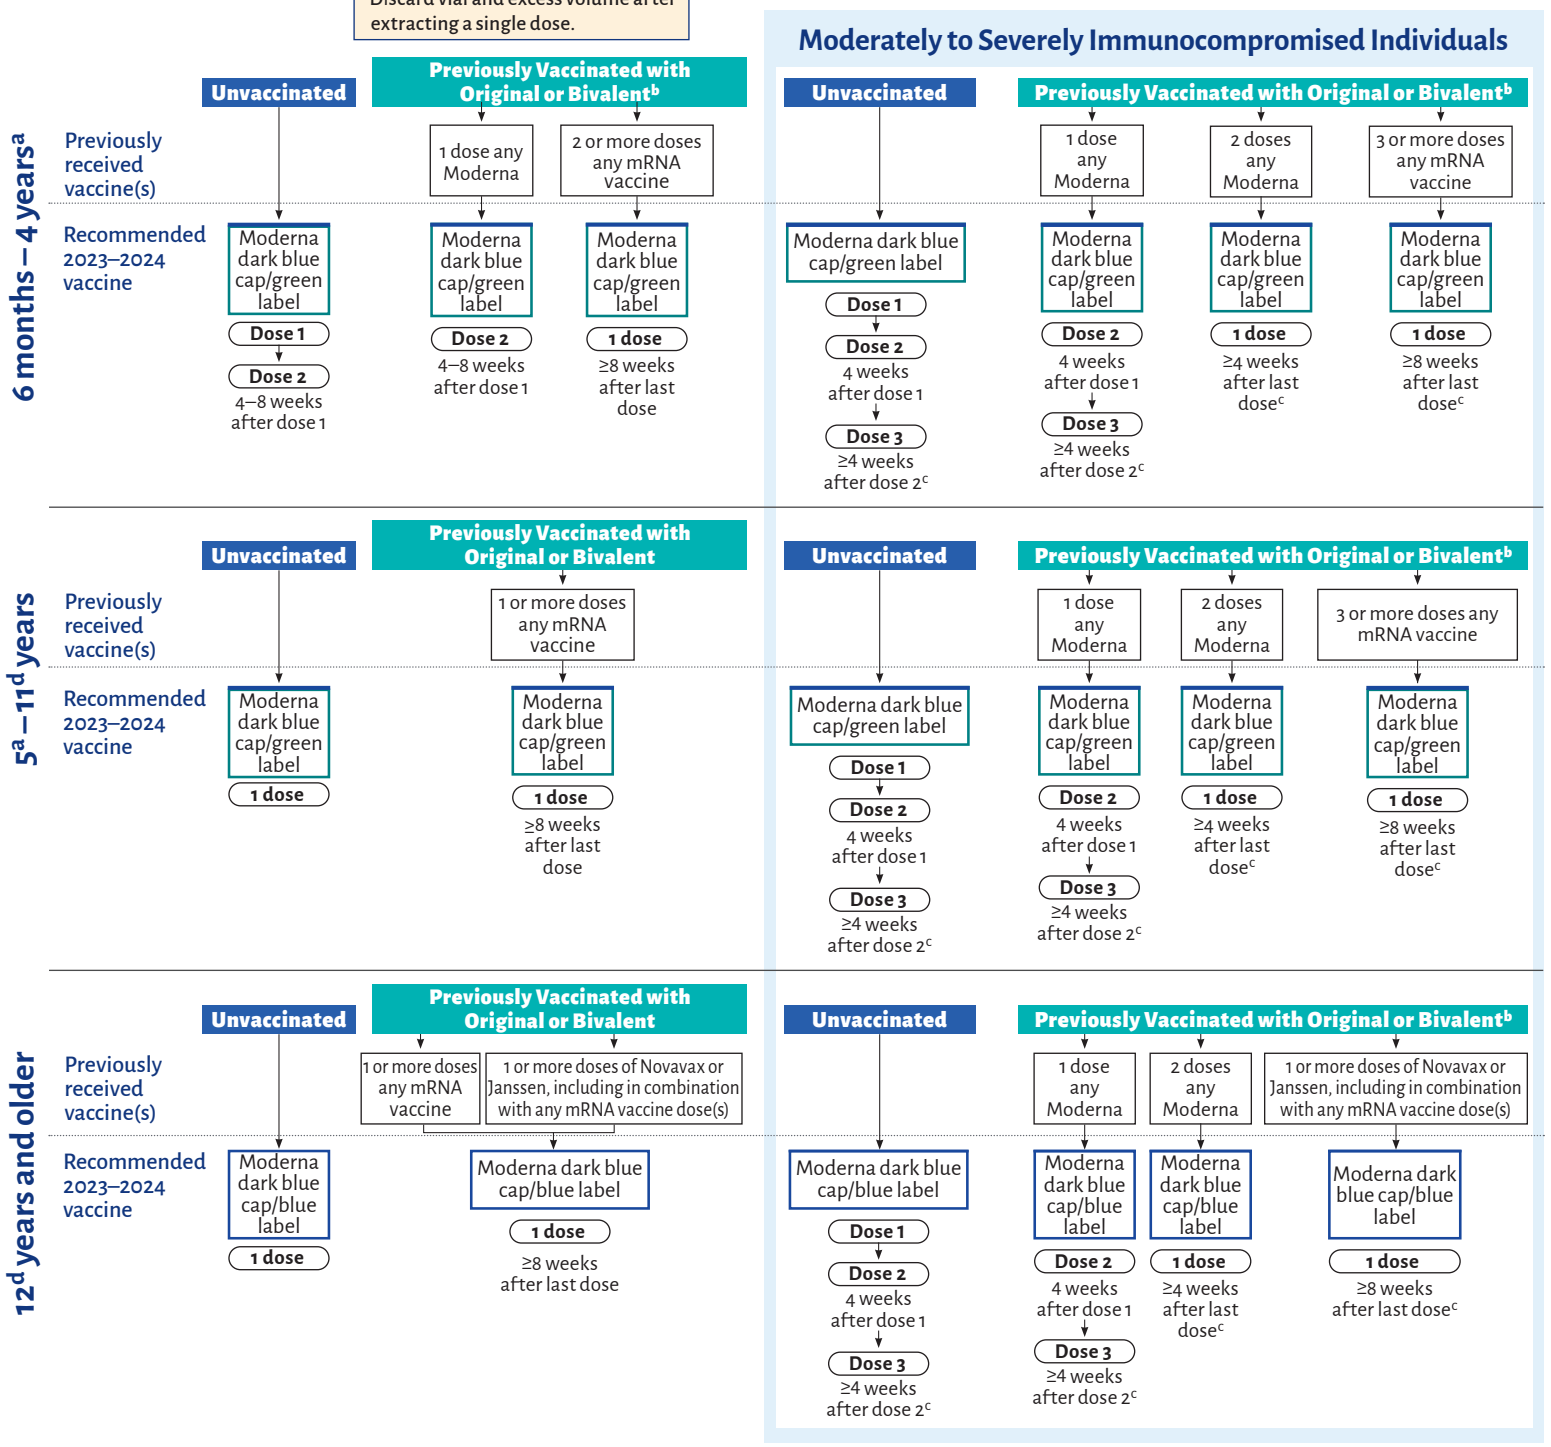

d. For children who turn 11 to 12 years during their vaccine series, follow dosing recommendations based on age at the time of vaccination.
