

# Children and COVID-19 Vaccinations Trends

**AAP Analysis of Data Posted by the Centers for Disease Control and Prevention  
as of January 5, 2022**

American Academy of Pediatrics  
DEDICATED TO THE HEALTH OF ALL CHILDREN®

# Updated Version of the Vaccination Report

Please note the following changes to the methods in this weekly report:

## A. Child Age Groupings:

**12-17 year-olds:** We are combining data for 12-15 and 16-17 year-olds. COVID-19 vaccines have been available for all in this group since 5.10.21.

**5-11 year-olds:** COVID-19 vaccines became available for this age group 11.2.21. Vaccination data specific to this group was made available in CDC public-use data 3 weeks later. We will be tracking vaccination for this group separate from 12-17 year-olds.

**B. Data Sources:** In reports up through 11.10.21, we used 2 different sources from the CDC to provide breakouts by age and geography: “Demographic Trends of People Receiving COVID-19 Vaccinations in the United States” (URL: <https://covid.cdc.gov/covid-data-tracker/#vaccination-demographics-trends>) and “COVID-19 Vaccinations in the United States, Jurisdiction” (URL: <https://data.cdc.gov/Vaccinations/COVID-19-Vaccinations-in-the-United-States-Jurisdiction/unsk-b7fc>). To combine ages 12-17, we are using only the jurisdiction file which may create minor shifts in the cumulative trends.

Interested readers should refer to the CDC and individual states where more information might be available.

## COVID-19 Vaccine Eligibility: Timeline for Children

The FDA issued the first Emergency Use Authorization (EUA) for use of the Pfizer-BioNTech COVID-19 Vaccine in **people 16 years and older** on 12.11.2020, followed by ACIP recommendations and CDC approval for its use on 12.13.2020. However, the vaccine was not available for the non-elderly general public in most states until sometime in the Spring of 2021. Persons aged 16+ in Massachusetts, for example, started to receive their first COVID shots on 4.19.2021.

The FDA approved the use of the Pfizer-BioNTech COVID-19 Vaccine in **children ages 12 to 15** on an emergency use basis on 5.10.2021, followed by ACIP recommendation and CDC approval the same week.

The FDA issued an EUA for the Pfizer vaccine for **children ages 5 to 11** on 10.29.2021, followed by ACIP recommendation and CDC approval on 11.2.2021.

# Status of COVID-19 Vaccinations for US Children as of 1.5.2022

## Children Ages 5-11 Years

- ❑ **7.0** million (**25%**) US children ages 5-11 have received **at least one dose** of COVID-19 vaccine
- ❑ Vaccination rates vary highly across states, from **9% to 57%** of children 5-11 receiving their first vaccine.

## Children Ages 12-17 Years

- ❑ **15.7** million (**63%**) US children ages 12-17 have received **at least one dose** of COVID-19 vaccine
- ❑ **13.2** million (**53%**) of these children are **fully vaccinated**
- ❑ At this time about **9.4** million children 12-17 have yet to receive their first COVID-19 vaccine dose. This past week about **145,000** received their first vaccine.
- ❑ Vaccination rates vary highly across states: In **10** states, at least 3 quarters of 12-17 year-olds have received at least 1 dose, and in **16** states, under half have received 1 dose.

# COVID-19 Vaccinations for US Children Ages 5-11

11.3.21 to 1.5.2022

## US Children Ages 5-11 Receiving Their Initial COVID-19 Vaccination

As of January 5:

**7.0 million (25%)**  
US children ages 5-11 had received at least **one dose** of COVID-19 vaccine

Per public-use data from the CDC

# US Population by Age Group, 2020

In 2020, children  
(72.8M under Age 18)  
made up **22.2%**  
of the total  
US population

**Source:** AAP analysis of report published by US Bureau of Census on June 17, 2021: State Population by Characteristics: 2010-2020. Single Year of Age and Sex for the Civilian Population. [Link: State Population by Characteristics: 2010-2020 ([census.gov](https://www.census.gov)) ]

## Data Sources and Methods

- This report includes US COVID-19 vaccine child recipients based on provisional data released by the CDC in a data series titled “COVID-19 Vaccinations in the United States, Jurisdiction.” (URL: <https://data.cdc.gov/Vaccinations/COVID-19-Vaccinations-in-the-United-States-Jurisdiction/unsk-b7fc> ).
- Cumulative trends and weekly changes are updated weekly as the CDC revises and updates its data series. Sporadic child vaccinations prior to May are included in the cumulative counts although not shown by week in the charts.
- Individual states may have additional or more recent information on their web sites. State population totals are based on 2020 population projections published by the US Census Bureau (URL: <https://www.census.gov/programs-surveys/popest/technical-documentation/research/evaluation-estimates/2020-evaluation-estimates/2010s-state-detail.html> )
