Facilitated Mini Training – Developmental Surveillance

This course was supported by funds from the Centers for Disease Control and Prevention (Cooperative Agreement Number #6 NU38OT000282-01-01). Its contents are solely the responsibility of the authors and do not necessarily represent the official views of the Centers for Disease Control and Prevention or the Department of Health and Human Services.

The format for the following training was inspired by the Spark trainings developed by the Adolescent Health Initiative at the University of Michigan. Their trainings can be found on their website at: http://bit.ly/AHI_Spark.
WHAT IS DEVELOPMENTAL SURVEILLANCE?

• Developmental surveillance is the ongoing process of monitoring a child’s development at each health supervision visit and recognizing those who may be at risk of developmental delays.
6 COMPONENTS OF DEVELOPMENTAL SURVEILLANCE

1. Talk with parents to elicit any concerns.
2. Take a developmental history.
3. Observe the child.
4. Identify risks, strengths, and protective factors.
5. Document the process and findings.
6. Communicate with others.
WHY IS DEVELOPMENTAL SURVEILLANCE IMPORTANT?
HOW IS DEVELOPMENTAL SURVEILLANCE DIFFERENT FROM DEVELOPMENTAL SCREENING?

Developmental Surveillance
• Ongoing monitoring of a child’s development
• DOES NOT require the use of specific tests
• If surveillance indicates a concern, screening is conducted

Developmental Screening
• Use of validated, standardized tests at recommended ages
• Should also be conducted if the parent, caretaker, or clinician has any concerns

DEVELOPMENTAL SURVEILLANCE IN ACTION

• How does the existing partnership between the medical home and family impact the conversation about developmental concerns?
• Why was it important to ask about findings from other early childhood professionals?
• How might the story be different if the team/clinician did not ask about findings from others?
• How can providing information back to the early childhood professional help?
HOW CAN DEVELOPMENTAL SURVEILLANCE BE IMPLEMENTED IN THIS PRACTICE?
