

Global Health Events & Sessions

Live*

Saturday, October 3

12:00 - 3:00 PM CDT

C2200 Peds 21: Fighting Racism to Advance Child Health Equity: A Call to Action

This session equips pediatricians to advance child health equity by applying an anti-racist lens to the systems shaping health and medicine. Pediatricians will learn how to address implicit biases, create inclusive workplaces, and relate with cultural humility. Attendees will also learn how to take practical action to fight racism.

Speakers: Rhea Boyd, MD, MPH, FAAP, Tiffani Johnson, MD, Jyothi Marbin, MD, FAAP, and Maria Trent, MD, MPH, FAAP

3:00 - 5:15 PM CDT

H2602 Council on Immigrant Child and Family Health Program: Fostering Multilevel Resilience Among Children in Immigrant Families

This program will help pediatricians understand the impact of immigration on the physical and mental health of immigrant children and their families and provide

multisector policy solutions that promote health, safety, and resilience.

Speakers: Beth Dawson-Hahn, MD, MPH, FAAP, Lisa Fortuna, MD, MPH, and Marielena Hincapie

Sunday, October 4

8:00 - 10:00 AM CDT

H3000 Joint Program: Section on Global Health, Section on Surgery, and Section on Bioethics: Beyond Short-Term Missions: Lessons for Medical and Surgical Disciplines

This program will provide a critical review of the history of global health engagement from the field's historical roots in colonialism and mission-based trips to more sustainable partnerships, and consider the ethical issues related to such engagement. Faculty will highlight models of global health engagement from medical and surgical specialties that adhere to ethical standards and address capacity-building and systems-strengthening.

Speakers: Emmanuel Ameh, MBBS, Matthew DeCamp, MD, PhD, and Megan McHenry, MD, FAAP

Moderators: Heather Haq, MD, MHS, FAAP, and Steven Leuthner, MD

The AAP Virtual National Conference & Exhibition will provide a range of opportunities for learning on your own schedule: on-demand sessions will be released to view at your own pace; *live sessions will take place from October 2-5; and recordings of both on-demand and live sessions will be available through January 31, 2021.

The American Academy of Pediatrics (AAP) is accredited by the Accreditation Council for Continuing Medical Education (ACCME) to provide continuing medical education for physicians.

This activity has been approved for *AMA PRA Category 1 Credit*.™

10:00 - 11:00 AM CDT

L3101 Supporting Families Globally During COVID-19: How Pediatricians Make a Difference

As COVID-19 changes from an acute crisis to an undulating pandemic, health care providers who work in a global health ecosystem face many challenges. This session will discuss how pediatricians in the US and abroad can support families in their practices, communities, and beyond by advocating for child-friendly policies, coaching caregivers, and recognizing their own biases.

Faculty: Agnes Binagwaho, MD, PhD, Roopa Dhatt, MD, Luwei Pearson, MBBS, MsC, and Giuseppe Raviola, MD

Moderator: Zulfiqar Bhutta, PhD, MBBS, FRCPC, FAAP

3:00 - 5:00 PM CDT

H3805 Section on Minority Health, Equity, and Inclusion Program: Dissecting Health Disparities: Examining the Intersection of Policy, Law, and Racism

This program will provide a historical overview of disparate health care delivery in the US, the impact of policies and laws on health disparities, and practical tools for mitigating inequities.

Speakers: Alden Landry, MD, Aswita Tan-McGrory, MBA, MSPH, Joel Teitelbaum, JD

Moderator: Patricia Rodriguez, MD, FAAP

Monday, October 5

3:00 - 5:00 PM CDT

L4104 Communication Strategies to Advocate for Children in Immigrant Families

Serving immigrant children requires pediatricians to partner with government officials, lawmakers, and community members who may have very different perspectives. Learn how the words we use and the stories we tell can help shift a conversation and make allies out of potential opponents as we advocate for immigrant children's needs.

Faculty: Olanrewaju (Lanre) Falusi, MD, FAAP, and Anisa Ibrahim, MD, FAAP

On-Demand

Global Health Skills: Practical Tips for the Field Session I

A clinical case presentation will lead into skills sessions that review nuances of intraosseous placement in resource-limited areas and demonstrate use of oral rehydration solution and rehydration solution for

HBB Celebrates 10 Years

8:00 AM - 12:00 PM CDT

H4000 Joint Program: Section on Global Health (formerly known as SOICH) and Helping Babies Survive

This year marks the 10th anniversary of Helping Babies Breathe (HBB), which has become one of the AAP's most visible and widely recognized global health initiatives. We will highlight the indelible mark that HBB has made as well as critically examine successes, challenges and the way forward for global neonatal health. SOGH will also provide programming updates.

Speakers: Errol Alden, MD, FAAP (President, International Pediatric Association), Ribka Amsalu, MD (UCSF), Tore Laerdal (Laerdal), Pat McGann, MD, MS, FAAP (SOGH Chairperson), Sarah Ngoma (President, Midwives Association Zambia), Janna Patterson, MD, MPH, FAAP (SVP, Global Child Health & Life Support, AAP) Data Santorino (Uganda), and Mandy Slutsker, MPH (Director, Global Child Health Advocacy, AAP)

Moderators: Danielle Ehret, MD, MPH, FAAP, Michael Visick, MD, FAAP, Lily Kak (USAID), Carl Bose, MD, FAAP, and Susan Niermeyer, MD, MPH, FAAP

Plenary Session

12:00 - 1:00 PM CDT

P4300 Practicing Socially-Responsive Pediatrics: Why Health Equity Begins in Communities Not Clinics

Faculty will provide personal and professional insights into the importance of social responsiveness to advancing health equity for racial/ethnic minority children, children in immigrant families, and low-income families. She will inspire the audience to step out of their comfort zone when speaking up for children and families.

Speaker: Omolara Uwemedimo, MD

malnutrition. These skills will aid the clinician in providing high-quality care in the absence of familiar tools and auxiliary staff.

Presenters: Keri Cohn, MD, and Alexandra Vinograd, MD, FAAP

Global Health Skills: Practical Tips for the Field Session II

A clinical case presentation will lead into skills sessions that demonstrate how to set up and use bubble continuous positive airway pressure from easily found materials in low-resource settings. Intravenous (IV) fluid mixing and the calculation of drip rates when pre-mix IV fluids are not available will be demonstrated. These skills will aid the clinician in providing high-quality care in the absence of familiar tools and auxiliary staff.

Presenters: Keri Cohn, MD, and Alexandra Vinograd, MD, FAAP

Map Your Career in Global Child Health

Cases will be used to help attendees explore five career pathways in global health: research, education, clinical, nonprofit, and local advocacy. Using self-identified

passions, talents, and assets, participants will be guided in making a career map. They will identify goals and action steps to develop their career.

Presenters: Adelaide Barnes, MD, and Amy Rule, MD, MPH, FAAP

Trauma-Informed Approach to Working With Immigrant Families and Adolescents

Faculty will discuss best practices for caring for immigrant adolescents and families using an evidence-based framework and approach to trauma-informed care. Attendees will learn actions they can take to foster connections and trust, with the goal of improving the sensitivity and efficacy of their practice.

Presenter: Kathleen Miller, MD, FAAP

Simultaneous Translated Sessions

Live sessions will feature simultaneous English/Spanish translations, and viewers will be able to listen in either English or Spanish when watching on-demand sessions. In the online conference schedule at AAPexperience.org, translated session will be indicated with an icon.

Live

Saturday, October 3

Plenary Session

10:00 - 11:00 AM CDT

P2000 AAP President's Address

Join AAP President Sara "Sally" H. Goza, MD, FAAP, as she provides an update on AAP efforts to advance the Agenda for Children and reflects on her year as president of the AAP.

P2000 AAP President's Address

Hear from Dr. Anthony S. Fauci, director of the National Institute of Allergy and Infectious Diseases at the U.S. National Institutes of Health, as he discusses "COVID-19: Public Health and Scientific Challenges." Following, Dr. Fauci will sit down with AAP President Sara "Sally" H. Goza, MD, FAAP, for a question and answer session.

12:00 - 12:30 PM CDT

L2201 Caring for Children with Medical Complexity in the Time of COVID-19

Full description pending

Faculty: Dennis Kuo, MS, MHS, FAAP

L2204 Strategies to Address Vaccine Hesitancy

Faculty will discuss how to engage parents with anti-vaccine sentiments in meaningful conversation that will enhance their knowledge of vaccine science. Discussion will include the origins of vaccine hesitancy, its impact on the incidence of vaccine-preventable diseases, the health care community's response, and strategies to address vaccine hesitancy in the office setting.

Faculty: Paul Offit, MD, FAAP

1:00 PM - 1:30 PM CDT

L2302 Mastering Coping Skills in Turbulent Times

Coping techniques will be introduced, and evidence-based approaches to learn and apply these skills in the clinical setting will be demonstrated and

experienced. Knowledge of these advanced coping skills will better prepare clinicians to recognize and address stress in their patients and families.

Faculty: Hilary McClafferty, MD, FAAP

L2304 COVID-19 Pregnancy & Newborn Care

Full description pending

Faculty: Karen Puopolo, MD, PhD, FAAP

2:00 PM - 3:00 PM CDT

L2502 Keeping Children Safe: Hot Topics in Injury Prevention

This session will focus on AAP policy statements on reducing pediatric injuries as well as forthcoming work from the Council on Injury, Violence, and Poison Prevention. Attendees will learn about the evidence behind these policy statements and some of the hottest topics in pediatric injury prevention including how pediatric injuries have been impacted by the COVID-19 pandemic.

Faculty: Maneesha Agarwal, MD, FAAP, and Sofia Chaudhary, MD

L2504 Test Your Visual Diagnostic Skills

Explore cases of common and uncommon diseases in infants, children, and adolescents seen in the clinic, hospital, and emergency department. Digitized photos and videos will augment case presentations. This session will reaffirm the clinician's role as diagnostician.

Faculty: Mark Weems, MD, FAAP

Sunday, October 4

10:00 - 11:00 AM CDT

L3100 Talking to Kids About Racism

Faculty: Ashaunta Anderson, MD, MPH, FAAP

L3101 Supporting Families Globally During COVID-19: How Pediatricians Make a Difference

As COVID-19 changes from an acute crisis to an undulating pandemic, health care providers who work in a global health ecosystem face many challenges. This session will discuss how pediatricians in the US and abroad can support families in their practices, communities, and beyond by advocating for child-friendly policies, coaching caregivers, and recognizing their own biases.

Faculty: Agnes Binagwaho, MD, PhD, Roopa Dhatt, MD, Luwei Pearson, MBBS, MsC, and Giuseppe Raviola, MD

Moderator: Zulfiqar Bhutta, PhD, MBBS, FRCPCH, FAAP

12:00 - 12:30 PM CDT

L3401 Infection Prevention & Control: Your Questions Answered

Full description pending

Faculty: Ann-Christine Nyquist, MD, MSPH, FAAP

L3402 Dermatologic Potpourri: Common Problems Seen in the Office

Faculty will discuss head lice, tinea capitis, diaper dermatitis, warts, molluscum, scabies, pityriasis rosea, mastocytosis, and other conditions commonly seen in the office setting. Indications for referral will be reviewed.

Faculty: Latanya Benjamin, MD, FAAP

1:00 - 1:30 PM CDT

L3501 Does My Patient Have MIS-C? When to Suspect Multisystem Inflammatory Syndrome in Children

This session will provide the latest information on multisystem inflammatory syndrome in children (MIS-C), including signs and symptoms, common laboratory findings, current treatment approaches, and recommended follow-up. While MIS-C is rare, pediatricians should be equipped to quickly identify potential cases given the anticipated COVID-19 surge this fall and winter.

Faculty: Sandy Hong, MD, FAAP

L3502 Ethical Issues in Access to Care for Children Who are Undocumented

This session will provide pediatricians with practical guidance on addressing ethical issues that arise in the care of children who are undocumented. The session will focus on the challenges these children face in accessing appropriate care and confidentiality concerns raised by documenting immigration status in medical records.

Faculty: Mark Kuczewski, PhD

Plenary Session

2:00 - 3:00 PM CDT

P3700 Stockman Lecture: Navigating the Chronic Disease Journey as a Patient and Clinician

Thomas Glenn, M.D., was born with hypoplastic left heart syndrome and now is a pediatric cardiology fellow. He will share how physicians can play a vital role in helping children and teens with chronic conditions develop resilience. Dr. Glenn also will outline strategies to help young patients “own” their conditions and transition from pediatric to adult providers.

P3701 Using Trauma-Informed Care to Provide a Safe, Stable, and Nurturing Environment for All Children

This session will provide an overview of trauma-informed care. It will illustrate what trauma-informed care looks like at the practice and community levels. It will highlight take-away points from the upcoming AAP policy statement and clinical report on trauma-informed care to assist providers working with children and families.

Speaker: Moira Szilagyi, MD, PhD, FAAP

P3702 Policing as a Pandemic of Trauma for Youth of Color

Youth of color navigate a world that is not always fair or friendly. Pediatricians care for youth who have been physically or emotionally hurt following encounters with law enforcement. A growing body of data and outcry from pediatrician and youth advocates have shined a light on this public health crisis.

Speaker: Cornell Brooks, JD, MDiv

Monday, October 5

10:00 - 11:00 AM CDT

L4101 Meet the Red Book Committee

This session will provide an update on immunization recommendations and other diagnostic and management issues germane to pediatric infectious diseases. Attendees also will have an opportunity to question members of the AAP Red Book Committee about prevention and treatment recommendations and learn about how these recommendations are developed.

Faculty: Mary Caserta, MD, FAAP, Yvonne Maldonado, MD, FAAP, and Sean O’Leary, MD, FAAP

L4104 Communication Strategies to Advocate for Children in Immigrant Families

Serving immigrant children requires pediatricians to partner with government officials, lawmakers, and community members who may have very different perspectives. Learn how the words we use and the stories we tell can help shift a conversation and make allies out of potential opponents as we advocate for immigrant children’s needs.

Faculty: Olanrewaju (Lanre) Falusi, MD, FAAP, and Anisa Ibrahim, MD, FAAP

Plenary Session

2:00 - 3:00 PM CDT

P4300 Practicing Socially-Responsive Pediatrics: Why Health Equity Begins in Communities Not Clinics

Dr. Uwemedimo will provide personal and professional insights into the importance of social responsiveness to advancing health equity for racial/ethnic minority children, children in immigrant families, and low-income families. She will inspire the audience to step out of their comfort zone when speaking up for children and families.

Speaker: Omolara Uwemedimo, MD

P4301 Children, Nature and a Healthy, Sustainable Future

Research shows spending time in nature improves children’s physical and mental health, school performance, and well-being. It also can be an antidote to sedentary lifestyles, social isolation, and toxic stress. This session will empower pediatricians to advance child health equity by connecting more children with nature.

Speaker: Richard Louv

P4302 Closing Keynote Address

Full description pending

10 Ways to Use Digital Tools to Promote Health

This session will introduce 10 ways in which pediatricians can use digital tools to understand health information, promote healthy behaviors and quality family time, and engage with patients.

Faculty: Megan Moreno, MD, MEd, MPH, FAAP

Advice on New Devices: E-cigarettes, Vape Pens, Hookah

Faculty will review new and emerging tobacco products such as vaping devices, tobacco heating units, and hookah. Information on use patterns, including co-use with other products, associated health risks, and strategies to address product use with patients also will be presented.

Faculty: Susan Walley, MD, CTTS, FAAP

All That Wheezes is Not Asthma

Faculty will review causes of localized wheezing through case presentations and differential diagnosis of unilateral wheezing, including foreign bodies, bronchomalacia/bronchial stenosis, airway tumors, mucus plugs, and compressing airway masses. Management strategies and when to refer also will be discussed.

Faculty: Chris Landon, MD, FAAP

Birthmarks: Red, White, Blue, Brown

Faculty will discuss various birthmarks, addressing etiology, workup, and treatments.

Faculty: Megha Tollefson, MD, FAAP

Caring for Children with Cerebral Palsy

This session will focus on the primary care pediatrician's role in the care of children with cerebral palsy. Faculty will address behavioral and mental health; respiratory care; nutrition and bowel management; and integration of patient-centered medical home services with those of schools and other community agencies.

Faculty: Katherine Steingass, MD, FAAP

Caring for Patients with Cleft Lip or Palate

This session will cover basic care of the child with cleft lip and/or palate from birth to adulthood. Attendees will become knowledgeable about the general timing of surgery and what their patients will experience.

Faculty: William Hoffman, MD, PhD, FAAP

Caring for Transgender Youth

This session will focus on the diagnosis of gender dysphoria, outpatient management of gender-affirming hormones, and surgical options for transgender youth. Medical, surgical, and patient perspectives will be included. Faculty also will discuss how to help patients and parents navigate sex-segregated spaces in schools, including bathrooms, locker rooms, and competitive

athletics.

Faculty: Aydin Olson-Kennedy, LCSW, and Johanna Olson-Kennedy, MD

Concussion Recovery: Return to Learn, Play, Life

Faculty will provide an update on evidence-based and consensus recommendations for concussion management, focusing on individualized return to learn, gradual return to play, and psychological issues that challenge the return to activities of daily living. Faculty will discuss recommendations for early return to school with accommodations and early cardiovascular activity to promote recovery.

Faculty: Tracy Zaslow, MD

Dermatoses in Children of Color

Faculty will discuss dermatoses occurring in more darkly pigmented skin. Photographs of cases will be used to highlight specific differences.

Faculty: Latanya Benjamin, MD, FAAP

Digital Health: How to Help Families Navigate Media Use

This session will provide an overview of the science behind the 2016 AAP guidelines for media use by children ages 5 and younger and discuss concepts such as interactivity, mobility, and persuasive design. Faculty also will discuss how to help families establish healthy media use practices.

Faculty: Jenny Radesky, MD, FAAP

ENT Potpourri

Faculty will review cases featuring common presentations of ear, nose, and throat disorders, their differential diagnosis, and common treatment algorithms. Viewers will gain an improved understanding of these common pediatric problems and when specialty referral is appropriate.

Faculty: Cristina Baldassari, MD, FAAP, and Philip Gaudreau, MD

Find Out the Latest on Autism Spectrum Disorder

This session will review the early signs of autism spectrum disorder. Faculty will provide an overview of evidence-based treatments and discuss controversies in the etiology and treatment of autism.

Faculty: Lisa Shulman, MD, FAAP

From Floods to Wildfires: Preparing for Natural Disasters Due to Climate Change

Pediatricians and others who care for children often face challenges during and after disasters. This session will draw on experiences with recent disasters such as floods and wildfires to highlight steps pediatricians can take to develop disaster preparedness and recovery plans at the community level.

Faculty: Mark Miller, MD, and Scott Needle, MD, FAAP

How to Integrate Mental Health Services Into Your Practice

Mental health services have been migrating into primary care practices to meet the growing need. Learn how to start an integrated mental health program, including business model options; workplace practices, policies and procedures; hiring; budgeting; and coding.

Faculty: Jay Rabinowitz, MD, FAAP

How to REALLY Support Breastfeeding Mothers

This session will teach how to assess proper positioning of breastfeeding babies, latch-on, and milk transfer. Faculty will discuss breastfeeding techniques and how pediatric providers can support breastfeeding mothers. Incorporating breastfeeding anticipatory guidance into pediatric practice will be emphasized.

Faculty: Eyla Boies, MD, FAAP, and Jane Morton, MD, FAAP

Managing Type 2 Diabetes in Children, Young Adults

This session will review research on management of type 2 diabetes in children and young adults. Faculty also will discuss management of blood glucose in maturity-onset diabetes of the young.

Faculty: Siri Greeley, MD, PhD

Murmurs and Chest Pain: Diagnosis and Management Pearls

Faculty will use cases to illustrate the bedside diagnosis and management of common cardiac conditions, including chest pain and syncope.

Faculty: Kenneth Zahka, MD, FAAP

Musculoskeletal Problems in Newborns and Infants

This session will feature case-based and didactic presentations of common musculoskeletal problems in newborns and infants, including developmental dysplasia of the hip, clubfoot, minor foot abnormalities, congenital spine conditions, torticollis, birth fractures, and brachial plexus palsy. Musculoskeletal manifestations of common genetic conditions also will be covered.

Faculty: Brian Shaw, MD, FAAP

New Bugs, New Drugs

This session will share up-to-date information on antimicrobial susceptibility of pathogens commonly seen in the outpatient and inpatient settings. Faculty will discuss newly published information on the availability and susceptibility of older and newer antimicrobials that have significant impact on clinical practice.

Faculty: Rana El Feghaly, MD, MSCI, FAAP, and Jennifer Goldman, MD, MS, FAAP

One Health: Addressing Connections Between Health and Environment

One Health is the effort of multiple disciplines working together locally, nationally, and globally to attain optimal health for people, animals, and the environment. Case studies relevant to One Health will illustrate the key role

pediatricians can play in disease control and prevention efforts.

Faculty: Kathleen Gensheimer, MD, and Christina Nelson, MD, MPH, FAAP

Tools to Assess and Manage Suicidality in Youth

This session will assist primary care pediatricians in assessing youth for suicidality using the Ask Suicide-Screening Questions. Faculty also will provide guidance on how to manage a positive screen with a brief suicide safety assessment. Attendees will learn how to communicate safety concerns to parents and youth and determine appropriate disposition.

Faculty: Khyati Brahmabhatt, MD

Visual Diagnosis of Infections and Their Mimickers

This session will familiarize clinicians with the dermatologic and clinical findings associated with various underlying infectious diseases. In addition, faculty will discuss other diagnoses that could mimic infections and how to differentiate among them.

Suggested workup, when to refer, and possible treatment options for these entities will be reviewed.

Faculty: Kimberly Horii, MD, FAAP, and Angela Myers, MD, MPH, FAAP

What's Trending in the Newborn Nursery?

This session will address hot topics in newborn medicine, including early-onset sepsis, hyperbilirubinemia, hypoglycemia, delayed cord clamping, vitamin K refusal, delayed bathing, care of late preterm infants, newborn procedures, cytomegalovirus testing, birth plan requests, and more. Faculty will review the latest evidence, provide practical tips, and identify gaps in literature.

Faculty: Arun Gupta, MD, FAAP, Juliann Lipps Kim, MD, FAAP

What's New in Pediatric Dermatology

Put on your seatbelt and get ready to learn about advances in pediatric dermatology. Topics include the role of Janus kinase inhibitors in alopecia areata, diagnosis of atypical herpes simplex virus infections, use of spironolactone for acne, propranolol comfort with hemangiomas, management of intrahepatic hemangiomas, and treatment for pediatric rosacea.

Faculty: Manasi Ladrigan, MD

What's New in Contraceptive Care?

Evidence-based contraceptive care is an essential component of adolescent health care. Faculty will provide an update on clinical recommendations for safe contraceptive use, offer counseling strategies to optimize patient autonomy, highlight regulations impacting the patient-physician relationship and adolescents' access to contraception, and review emergency contraception options.

Faculty: Tonya Chaffee, MD, MPH, FAAP
