

# Healthy Tomorrows Partnership for Children

## Sustainment of Projects

### Status of HTPCP Projects

At 1-Year Post-Funding (N=78)

The **Healthy Tomorrows Partnership for Children Program (HTPCP)**<sup>1</sup> is a public-private partnership between the Maternal and Child Health Bureau (MCHB) and the American Academy of Pediatrics (AAP).

In a discussion among projects completing their five years of funding, all agreed that partnerships are a critical part of sustainability planning. Several had specific strategies to continue their partnerships, including identifying liaisons, engaging in problem solving together, sharing digital and other content, particularly updates and individualized reports, and creating linkages between partners. Other important factors in sustainability identified were community engagement, leveraging story telling to engage people in the mission, and sharing data in usable formats.
