

**POCUS PROGRAM DESCRIPTIONS-DIFFERENCES
AAP SECTION ON EMERGENCY MEDICINE
NCE 2024**

CLINICAL SKILLS LABS – 90 MINS EACH (2)

**L3101: Elevate Your Pediatric Practice Through Hands-On Point-Of-Care Ultrasound
(Instructed in English)**

Sunday, September 29, 2024
8:00 AM – 9:30 AM EDT
CME 1.50

ticketed event; registration required

Cost: \$95

Maximum Participants: 25

Participants instructed in English will advance point-of-care ultrasound, (POCUS) knowledge and skills through interactive didactics and hands-on rotations introducing attainable and clinically relevant ultrasound-guided procedural skills for peripheral IV access and thoracentesis. Evidence-based tools and resources will be provided to promote POCUS application and training in participants' home practice settings. This basic ultrasound lab is for primary pediatricians covering the diagnostic use of POCUS for childhood disease processes involving the lung.

Faculty: Antonio Riera, MD, FAAP | May W. Chen, MD, FAAP

L3102: Mejore su práctica pediátrica a través del uso de la ecografía en el punto de atención (POCUS)

(Instructed in Spanish / Presentado en Español)

Sunday, September 29, 2024
9:30 AM – 11:00 AM EDT
CME 1.50

ticketed event; registration required

Cost: \$95

Maximum Participants: 25

Participants instructed in Spanish will advance point-of-care ultrasound, (POCUS) knowledge and skills through interactive didactics and hands-on rotations introducing attainable and clinically relevant ultrasound-guided procedural skills for peripheral IV access and thoracentesis. Evidence-based tools and resources will be provided to promote POCUS application and training in participants' home practice settings. This basic ultrasound lab is for primary pediatricians covering the diagnostic use of POCUS for childhood disease processes involving the lung.

COURSES – ½ DAY EACH (3)

C3040: Point-of-Care Ultrasound (POCUS) Hands-On Fundamentals Course

Sunday, September 29, 2024

2:00 PM – 6:30 PM EDT

CME 3.75

ticketed event; registration required

Cost: \$250

Maximum Participants: 50

Introductory hands-on point-of-care ultrasound (POCUS) course for anyone wanting to learn more about the use of diagnostic and procedural ultrasound for trauma, the cardiac exam, lung exam, pediatric abdomen, soft tissue, musculoskeletal, peripheral IV access, & foreign body localization. CME is provided, not certification.

Faculty: Maher M. Abulfaraj, MBBS, FAAP | Shamicka North, MD | Amit Patel, MD, FAAP

C4004: Point-of-Care Ultrasound (POCUS) Hands-On Critical Competency Course

Monday, September 30, 2024

8:00 AM – 12:00 PM EDT

CME 3.75

ticketed event; registration required

Cost: \$300

Maximum Participants: 50

Intermediate hands-on point-of-care ultrasound (POCUS) course for those who care for critically ill children focusing on the use of diagnostic and procedural ultrasound for resuscitation including the pediatric RUSH Exam, vascular access, peripheral nerve blocks, and neonatal applications. CME is provided, not certification.

Faculty: Paul Khalil, MD, FAAP | Matthew M. Moake, MD, PhD, FAAP | Erik Su, MD, FAAP

C4005: Point-of-Care Ultrasound (POCUS) Management Course

Monday, September 30, 2024

1:00 PM – 5:00 PM EDT

CME 3.50

ticketed event; registration required

Cost: \$100

Maximum Participants: 50

Broad based multispecialty course focused on the establishment and maintenance of the core elements of a point-of-care ultrasound (POCUS) program in the primary care, outpatient, or hospital setting including discussion of workflow, credentialing, privileging, billing, & reimbursement. This course does not include hands-on education. CME is provided, not certification.
