

American Academy of Pediatrics (AAP) Maintenance of Certification (MOC) Portfolio Sponsorship

EVERY CHILD GETS THE RIGHT CARE EVERY TIME

In November 2012, the American Board of Pediatrics (ABP) granted the AAP Portfolio Sponsorship status, allowing the AAP to review and approve its own projects for Part 2 and Part 4 Maintenance of Certification (MOC). The Quality Cabinet, a group of AAP executive leadership, oversees the AAP MOC Portfolio.

Projects submitted through the AAP MOC Portfolio must:

- √ Follow the standards set forth by the ABP
- √ Have direct oversight from national AAP
 - ⇒ AAP group must be meaningfully involved in the design and implementation of the project
- √ Complete an AAP MOC Application form
- √ If approved, monitor physician participation and provide ongoing reports to the MOC Review Panel.

To apply through the AAP MOC Portfolio:

Applying through the AAP Portfolio is free! AAP groups interested in obtaining MOC credits for a project they are working on should apply through the AAP Portfolio by completing an AAP MOC application form, which is then reviewed by the MOC Review Panel.

Applications can be obtained from Tori Davis, QI and Certification Program Specialist (tdavis@aap.org).

Additional Information is available at www.aap.org/mocportfolio.

Portfolio status allows the Academy to more efficiently and effectively conduct quality improvement initiatives that meet the standards for MOC, and identify greater opportunity for collaboration among AAP groups working on quality improvement.

Most importantly, it offers AAP members a unique opportunity to generate and participate in member-driven quality improvement projects that will benefit children and also receive MOC credit.
