## What is the website link shared during the webinar for inhaler use and how to identify and prevent triggers?

The website links and QR codes are listed in the template provided by UT Kids San Antonio. UT Kids gives permission to use this template and replace with your own logo.

## 3. How can our practice create QR codes?

• Provided by UT Kids San Antonio (Dr. Cynthia Lopez): It is very easy to create your own QR codes. You can pick a free app (we use QRme.com) and download it. Once you choose a video you want to use, copy the link to the app and the app creates a QR code. Take a screen clip of the QR code and paste on a Word document and go from there. Each one takes about 30 seconds total.
