PROVIDING HEALTH INSURANCE FOR UTAH CHILDREN AND FAMILIES

Children make up 68% of Utah residents covered by Medicaid and CHIP.

This equals 195,061 Utah children, including:

- 100% of children in foster care
- 55% of children who live in or near poverty
- 31% of children born to moms covered by Medicaid
- 15% of children with disabilities or special health care needs such as diabetes and asthma
- 23% of infants, toddlers, and preschoolers

WHERE MEDICAID FITS IN:

CHILDREN’S COVERAGE IN UTAH

- 20% Medicaid and CHIP
- 64% Employer-sponsored insurance
- 9% Direct purchase, including Marketplace
- 7% Uninsured
- 1% Other, including Medicare, Tricare, VA

ENSURING HEALTHY DEVELOPMENT FROM THE START

Medicaid guarantees access to care for children through its Early and Periodic Screening, Diagnostic and Treatment benefit, known as EPSDT.

EPSDT is one of the best ways Medicaid helps vulnerable children stay healthy and on track with their peers. It:

- Identifies problems early
- Checks children’s health at periodic intervals
- Provides development, vision, and hearing screenings to detect problems
- Performs diagnostic tests to identify risks
- Provides treatment for any problems found
WE MUST PROTECT CHILDREN’S COVERAGE

AFTER YEARS OF PROGRESS, WE’RE LOSING GROUND

- In 2017, the number of uninsured children **increased** for the first time in a decade. **276,000** more U.S. children became uninsured, including 12,000 in Utah.

- In 2018, the number of children enrolled in Medicaid and CHIP **fell by about 840,000 nationwide**—including 15,337 in Utah.

WE MUST PROTECT CHILDREN’S COVERAGE

KEEP MEDICAID STRONG

Medicaid faces serious threats in states where enrollment barriers such as work reporting requirements, budget cuts, and moves to block grant or cap Medicaid funding are being proposed. Actions like these prevent Medicaid from doing its job of providing health insurance. We must prevent harmful changes that add costly administrative burden for states while also taking away people’s health coverage.

KEEP CHILDREN COVERED

States have made historic gains in covering children. But, with coverage rates stalling or headed in the wrong direction, we must double down on efforts to reach and enroll eligible children, focus on system improvements to keep them covered, and ensure that parents have health insurance, so they can keep themselves and their families healthy.
