

You may refer to the following steps to access AAP Journal CME quizzes on the AAP Publications website (images are samples)

AAP Grand Rounds: <https://publications.aap.org/aapgrandrounds>

NeoReviews: <https://publications.aap.org/neoreviews>

Pediatrics In Review: <https://publications.aap.org/pediatricsinreview>

1. Click on the View This Issue button to access the Table of Contents.

A screenshot of the AAP Publications website. The header includes the American Academy of Pediatrics logo and navigation links like "shopAAP", "Create Account", and "Login". Below the header, the "Pediatrics in Review" section is highlighted. It features the journal cover for Volume 42, Issue 12, dated December 1, 2021. A red arrow points to the "View This Issue" button. To the right, a "Latest" section lists articles: "Child Labor and Sex Trafficking", "Hemophilia: The Past, the Present, and the Future", and "Dermatologic Manifestations of Systemic Diseases in Childhood". A "Browse All" link is also present. On the far right, there is an advertisement for "All EQIPP courses included with AAP membership".

- Using the navigation menus on the top, navigate to the journal and issue you would like to complete quiz for.

4. If you are not logged into your account or do not have a corresponding subscription to access that content, you will see a notification. To verify that you are logged in, you can check your login status on the top right. If it says login, you would need to use the Individual login option.

The screenshot shows the AAP website header with the 'Login' button highlighted. A dropdown menu is open, showing 'Individual Login' as the selected option. The main content area displays the 'Asthma' article by Shilpa J. Patel, MD, MPH; Stephen J. Teach, MD, MPH. The article includes an abstract, author disclosure, and a 'Practice Gap' section. The 'Practice Gap' section states: 'Asthma is the most common chronic respiratory disease of childhood, a leading cause of emergency department visits, and 1 of the top 3 indications for hospitalization in children. Despite advances in the management of pediatric asthma, significant disparities in care and outcomes persist. To bridge these gaps, we must embrace the concept of asthma care across the continuum and extend our reach beyond the immediate patient-provider visit. After completing this article, readers should be able to: 1. Understand trends in prevalence, outcomes, and health disparities in pediatric asthma.'

5. Once you are logged in, you will see the indicator of My Account and your account profile. You will then be able to use the CME Quiz link to access the quiz.

The screenshot shows the AAP website with the 'My Account' dropdown menu open. The 'CME Quiz' link is highlighted with a red arrow. The main content area displays the 'Asthma' article by Shilpa J. Patel, MD, MPH; Stephen J. Teach, MD, MPH. The article includes an abstract, author disclosure, and a 'Practice Gap' section. The 'Practice Gap' section states: 'Asthma is the most common chronic respiratory disease of childhood, a leading cause of emergency department visits, and 1 of the top 3 indications for hospitalization in children. Despite advances in the management of pediatric asthma, significant disparities in care and outcomes persist. To bridge these gaps, we must embrace the concept of asthma care across the continuum and extend our reach beyond the immediate patient-provider visit. After completing this article, readers should be able to: 1. Understand trends in prevalence, outcomes, and health disparities in pediatric asthma.'

CME Quiz

Required Score: 60% Attempt: 1

Question 1 Required

You have been appointed as the president of a large pediatric health system. In looking at the system's readmission data, it was clear that asthma readmissions have one of the highest rates compared with national benchmarks. You design a strategic plan aimed at improving prevention strategies for childhood asthma in the population you serve with the goal to decrease readmissions. A friend who also child-reared children advised that asthma is not a disease, but rather a condition that can be managed. You decide to implement a new strategy for asthma management in your practice setting. Which of the following is the most appropriate first step?

Practice Gap

Asthma is the most common chronic respiratory disease of childhood, a leading cause of emergency department visits, and 1 of the top 3 indications for hospitalization in children. Despite advances in the management of pediatric asthma, significant disparities in care and outcomes persist. To bridge these gaps, we must embrace the concept of asthma care across the continuum and extend our reach beyond the immediate patient-provider visit.

Objectives

After completing this article, readers should be able to:

1. Understand trends in prevalence, outcomes, and health disparities in pediatric asthma.
2. Describe advances in understanding the pathophysiology of asthma.
3. Translate an understanding of asthma to a differential diagnosis in a child with wheeze.
4. Practice guideline-based management with accurate assessment of asthma severity and control.
5. Apply recent evidence-based emerging trends in the treatment of asthma.
6. Identify community-based strategies and quality improvement projects in your practice setting to ensure asthma care across the continuum for vulnerable children.
