

How Do I Retake PREP Subspecialty and NeoReviewsPlus (2022 and Prior)

1. Verify that you have answered all the questions in the assessment.

The screenshot shows the NeoReviewsPlus interface. At the top, there are navigation links for "Self-Assessment", "PREP Pearls", and "Editorial Board". On the left, a sidebar menu lists months from January to August, with "March" selected. The main content area is titled "March" and includes a "Print" icon. A progress bar shows "PROGRESS" with a red border, and statistics: "Total Questions: 8", "Total Answered: 5", and "Correct: 3". Below this is a "View: All (8)" dropdown menu and a "Page 7 of 10" indicator. The "Question: 6" section contains a detailed clinical scenario about a 36-week gestation neonate with hypoxic-hypercarbic respiratory failure. The text describes the mother's prenatal care, the fetal ultrasound at 17 weeks, and the neonate's symptoms and delivery. It lists vital signs (37.1°C, 174 beats/min, 89/52 mm Hg) and physical findings (head asymmetry, diminished breath sounds, abdominal distension, rocker bottom feet). It also mentions the use of high-frequency ventilation, 100% oxygen, and inhaled nitric oxide, resulting in a preductal saturation of 92% and a postductal saturation of 87%. A chest radiograph is performed (Figure 1). The question asks: "Of the following, the test MOST likely to diagnose this neonate's underlying condition is".

2. If you still have unanswered questions, use the question view drop down to filter the unanswered questions.

This screenshot shows the same NeoReviewsPlus interface as above, but with the "View: All (8)" dropdown menu open. The menu options are "All", "Unanswered", "Incorrect", "Category", "ACGME", "Question 1", "Question 2", "Question 3", "Question 4", "Question 5", "Question 6", and "Question 7". The "Unanswered" option is circled in red, indicating it has been selected to filter the questions. The rest of the page content, including the clinical scenario and the question text, remains visible in the background.

3. Continue to answer each question. Once all the questions are complete, you will see the option to Retake again.

The screenshot shows the NeoReviewsPlus interface for the month of March. The top navigation bar includes 'Self-Assessment', 'PREP Pearls', and 'Editorial Board'. On the left, a sidebar menu lists months from Home to August, with 'March' selected. The main content area displays 'March' with a 'Print' icon. A green checkmark and the text 'CONGRATULATIONS THIS ASSESSMENT IS NOW COMPLETE.' are shown, along with a 'CLAIM CREDIT' button. Below this, a progress bar shows 'Total Questions: 8', 'Total Answered: 8', and 'Correct: 5'. A 'Take Again' button is circled in red. The question text reads: 'A female infant is delivered at 27 weeks of gestation with a birthweight of 850 g to a mother with premature rupture of membranes and preterm labor. The infant has been in your neonatal intensive care unit for 5 weeks, and has been receiving enteral feedings over 90 minutes by gavage tube; her parents hold her upright for 45 minutes after each feeding. She has mild apnea and bradycardia events daily and is receiving caffeine. The nursing staff is concerned that reflux may be causing the apnea and bradycardia events, and asks you to consider pharmacologic therapy for reflux. Metoclopramide, ranitidine, erythromycin, and omeprazole are being discussed. Of the following, the complication MOST associated with a medication that acts via the 5-hydroxytryptamine (5-HT) receptor is

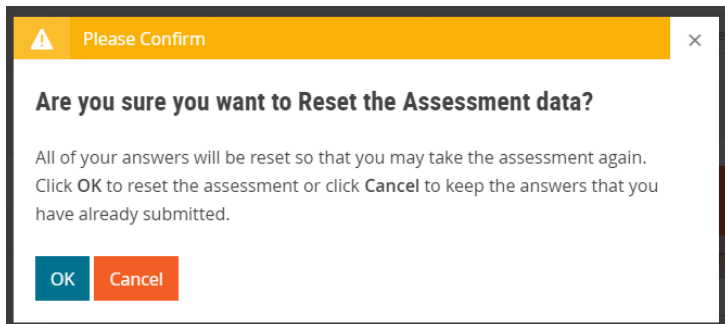

The screenshot shows the NeoReviewsPlus interface for the month of March. The top navigation bar includes 'Self-Assessment', 'PREP Pearls', and 'Editorial Board'. On the left, a sidebar menu lists months from Home to August, with 'March' selected. The main content area displays 'March' with a 'Print' icon. A yellow warning triangle and the text 'FAILING SCORE YOU HAVE NOT MET THE MINIMUM PASSING SCORE FOR THIS ASSESSMENT.' are shown, along with a 'TAKE AGAIN' button. Below this, a progress bar shows 'Total Questions: 8', 'Total Answered: 8', and 'Correct: 3'. A 'Take Again' button is circled in red. The question text is identical to the previous screenshot: 'A female infant is delivered at 27 weeks of gestation with a birthweight of 850 g to a mother with premature rupture of membranes and preterm labor. The infant has been in your neonatal intensive care unit for 5 weeks, and has been receiving enteral feedings over 90 minutes by gavage tube; her parents hold her upright for 45 minutes after each feeding. She has mild apnea and bradycardia events daily and is receiving caffeine. The nursing staff is concerned that reflux may be causing the apnea and bradycardia events, and asks you to consider pharmacologic therapy for reflux. Metoclopramide, ranitidine, erythromycin, and omeprazole are being discussed. Of the following, the complication MOST associated with a medication that acts via the 5-hydroxytryptamine (5-HT) receptor is

4. You will be able to select which questions you would like to retake

The screenshot shows a confirmation dialog box with a yellow header and a close button. The text reads: 'Please Confirm Are you sure you wish to take this assessment again?'. Below the text are three buttons: 'Retake All Questions', 'Retake Missed Questions', and 'Cancel'. The dialog box is overlaid on a question titled 'Question: 8'.

5. After completing one cycle of the assessment, you will also have a separate option to Reset the assessment at any time. **Please note that this option will reset the activity and will not carry over any of your completed answers from your current cycle.**

The screenshot shows the NeoReviewsPlus assessment interface. At the top, there are navigation links for 'Self-Assessment', 'PREP Pearls', and 'Editorial Board'. The main content area is titled 'March' and includes a 'Print' icon. A progress bar shows 'PROGRESS' with 'Total Questions: 8', 'Total Answered: 3', and 'Correct: 3'. A 'Reset Assessment' button is circled in red. Below the progress bar, there are dropdown menus for 'Learner Mode' and 'View: Unanswered (5)', and a page indicator 'Page 4 of 10'. The question is titled 'Question: 3' and describes a pediatrician consulting about a term newborn with an abnormally shaped head. The question asks for the most appropriate screening test for this newborn, with four options: A. audiogram, B. echocardiogram, C. electroencephalogram, and D. renal ultrasonogram. 'Submit' and 'Reset' buttons are at the bottom.
