Is your baby walking?

As your child grows, think about water safety around the house!

Stay within arm’s reach whenever your child is near water.

Have a pool?
Be sure you have a fence around all four sides, especially the side between the pool and house.

Use safety gates, or lock the door to the yard or garage, to keep your child from going outside unnoticed.

Empty buckets, bathtubs, and wading pools after each use.

Learn CPR and know how to get emergency help.

Keep the bathroom door closed. Install a latch or doorknob cover. Install latches on toilets.

Drowning prevention is a family activity!
Swim lessons for parents and toddlers are a first step toward water safety.

Children can drown in just 1-2 inches of water, and it can happen quickly and silently.

After birth defects, drowning is the No. 1 cause of death for children ages 1-4.
